WINS 2023

Tuesday 10 October 2023 - Thursday 12 October 2023

Rensselaer Polytechnic Institute

Scientific Programme

Recent Experimental Results of Elastic and Inelastic Neutron Scattering

This track is for work related to keV and MeV (fast) neutron scattering.

New Experimental Methods and Techniques

New methods to measure keV and MeV neutron scattering.

Theoretical Developments and Advancements

Theory developments for neutron scattering and angular distributions.

Nuclear Data Evaluations

Evaluation and methods related to elastic and inelastic neutron scattering.
