LHCb results with vector bosons (12' + 3')

Thursday 4 August 2016 14:30 (15 minutes)

A variety of vector boson measurements has been performed with Run 1 LHCb data, including inclusive Z/W cross-sections, the Z forward-backward asymmetry, Z plus charm, Z/W production with jets (including heavy flavor), and top production. Additionally, new inclusive Z/W cross-sections have been measured with Run 2 data. A summary of the most relevant results will be presented.

Presenter: LUCCHESI, Donatella (Universita e INFN, Padova (IT))

Session Classification: Strong Interactions and Hadron Physics

Track Classification: Strong Interactions and Hadron Physics
