CEC-ICMC 2017 - Abstracts, Timetable and Presentations

Wednesday 12 July 2017

M3OrG - Materials IV: Epoxy - Lecture Hall (16:15 - 17:45)

-Conveners: Klaus-Peter Weiss; Robert Walsh

time	[id] title	presenter
16:15	[18] Evaluation of the Fretting Resistance of the High Voltage Insulation on the ITER Magnet Feeder Busbars	Prof. EVANS, David
16:30	[219] Performance of Vacuum Epoxy Impregnated 2G-HTS Undulator Magnets	Dr KESGIN, Ibrahim
16:45	[548] Investigation on the Crack Propagation Behaviour of Kevlar®-49/Epoxy Laminate at Room and Cryogenic Temperatures for Aerospace Applications	HANDA, Danish
17:00	[344] A high field and cryogenic test facility for neutron irradiated superconducting wire	NISHIMURA, Arata
17:15	[119] Low cost high performance magnetocaloric materials for sub 50K refrigeration applications	Dr IHNFELDT, Robin
17:30	[250] Study of metallurgical factors in improving service life of wire drawing carbide dies using cryogenic treatment	Mr JOGLEKAR, Shreyas
