# CHEP 07

## Monday, September 3, 2007

**Poster 1: Day 1** (8:00 AM - 6:10 PM)

| [id] title | presenter | board |
|---|---|---|
| **[53] ALICE DAQ Online Transient Data Storage** | Mr FUCHS, Ulrich | 1 |
| **[108] FPGA based Compute Notes for High Level Triggering in PANDA** | Prof. KUEHN, Wolfgang | 3 |
| **[119] Using the Grid for Large Scale and Nightly Testing of the ATLAS Trigger & Data Acquisition System** | GARITAONANDIA ELEJABARRIETA, Hegoi | 4 |
| **[138] Data Stream handling in the LHCb experiment** | Dr NEUFELD, Niko | 5 |
| **[140] Online Data Monitoring in the LHCb experiment** | Dr FRANK, Markus | 6 |
| **[158] Data Acquisition Backbone Core DABC** | Dr ESSEL, Hans G. | 7 |
| **[191] cMsg - A general purpose, publish-subscribe, interprocess communication implementation and framework** | Dr TIMMER, Carl | 8 |
| **[262] Lorentz Angle Calibration for the CMS Pixel Detector** | CHIOCHIA, Vincenzo | 9 |
| **[268] Data Quality Monitoring for the CMS Electromagnetic Calorimeter** | Dr DELLA RICCA, Giuseppe | 10 |
| **[271] Low-level reconstruction software and regional unpacking for the CMS strip tracker** | Dr BAINBRIDGE, Robert | 11 |
| **[319] Alignment data streams for the ATLAS Inner Detector.** | Mr VENDA PINTO, Belmiro Antonio | 12 |
| **[330] Commissioning with cosmic rays of the Muon Spectrometer of the ATLAS experiment at the Large Hadron Collider** | NIKOLAIDOU, Rosy | 13 |
| **[333] Large Scale Access Tests and Online Interfaces to ATLAS Conditions Databases** | AMORIM, Antonio | 14 |
| **[342] Real-time analysis of the operational state of the CMS strip tracker readout system** | Dr MERSI, Stefano | 16 |
| **[367] The CMS Storage Manager and Data Flow in the High Level DAQ** | Ms SEXTON-KENNEDY, Elizabeth | 17 |
| **[377] The CMS Tracker Control System** | MASETTI, Lorenzo | 18 |
| **[421] Implementation and Performance of the ATLAS Second Level Jet Trigger** | Dr CONDE MUÍÑO, Patricia | 19 |
| **[432] Distributed database services in PHENIX - what it takes tosupport a Petabyte experiment.** | SOURIKOVA, Irina | 20 |
| **[437] Remote Management of nodes in the ATLAS Online Processing Farms** | Dr DOBSON, Marc | 21 |
| **[463] Computing in IceCube** | Mr KOHNEN, Georges | 22 |
| **[27] Multi-threaded Event Reconstruction with JANA** | Dr LAWRENCE, David | 23 |
| **[44] ATLAS Detector Maintenance And Operation Management Tool** | Mr COPY, Brice | 24 |
| **[57] StatPatternRecognition: A C++ Package for Multivariate Classification** | Dr NARSKY, Ilya | 25 |
| **[66] High-Performance Stream Computing for Particle Beam Transport Simulations** | Dr BAILEY, David<br>Dr APPLEBY, Robert | 26 |
| **[82] ATLAS's EventView Analysis Framework** | Dr FARBIN, Amir | 27 |

| | | |
|---|---|---|
| **[90] ATLAS Conditions Database Experience with the LCG COOL Conditions Database Project** | Dr VERDUCCI, Monica | 28 |
| **[100] Glance Project: a database retrieval mechanism for the ATLAS detector** | POMMES, Kathy | 29 |
| **[101] Usage of LSF for the batch farms at CERN** | Dr SCHWICKERATH, Ulrich | 30 |
| **[109] Oracle RAC (Real Application Cluster) application scalability, experience with PVSS and methodology** | GRANCHER, Eric | 31 |
| **[111] Evaluation of Goodness-of-Fit tests in physical use cases** | Dr PIA, Maria Grazia | 32 |
| **[120] Evaluating Disk Hardware for Small Deployments of PostgreSQL** | Mr WITHERS, Alexander | 33 |
| **[142] ATLAS Tile Calorimeter on-line monitoring system based on the Event Filter** | GOLLUB, Nils<br>GOLLUB, Nils | 35 |
| **[159] Runtime memory and data monitoring using Reflex for memory usage evaluation and data quality control.** | Dr LEGGETT, Charles | 36 |
| **[162] A Search Engine for the Engineering and Equipment Data Management System (EDMS) at CERN** | Mr TSYGANOV, Andrey | 37 |
| **[166] Performance Measurement and Monitoring for HENP Applications** | Dr BINET, Sebastien | 38 |
| **[205] COOL Performance Tests and Optimization** | CLEMENCIC, Marco | 39 |
| **[229] JetWeb: A library and server for Monte Carlo validation and data comparisons** | BUTTERWORTH, Jonathan | 40 |
| **[236] Control and monitoring of alignment data for the ATLAS endcap Muon Spectrometer at the LHC** | DOWELL, Craig | 41 |
| **[270] HEPTrails: An Analysis Workflow and Provenance Tracking Application** | Dr JONES, Christopher | 43 |
| **[274] Survey of the main HEP software components (1970 --> 2010)** | Dr BRUN, Rene | 44 |
| **[282] Management System of Event Processing and Data Files Based on XML Software Tools at Belle** | Dr ADACHI, Ichiro | 45 |
| **[294] An Inconvenient Truth: file-level metadata and in-file metadata caching in the (file-agnostic) ATLAS distributed event store** | Dr MALON, David | 46 |
| **[305] `Anvil' a case study of the Unified Software Development Process** | Dr PATTON, Simon | 47 |
| **[315] Towards a full implementation of a robust solution of a Domain Specific Visual Query Language DSVQL for HEP analysis** | Dr CONDE MUÍÑO, Patricia | 48 |
| **[350] Nightly builds and software distribution in the LCG / AA / SPI project** | Dr ROISER, Stefan | 49 |
| **[359] Web System to support analysis for experimental equipment commissioning** | DOTTI, Andrea | 50 |
| **[364] Using ROOT with Modern Programming Languages** | Prof. WATTS, Gordon | 51 |
| **[373] Usage and Extension of Maven to build, release and distribute Java and Native Code Projects** | DONSZELMANN, Mark | 52 |
| **[387] Dataharvester - a library for reading and writing ``hierarchic tuples'' from/to various file formats** | Dr WALTENBERGER, Wolfgang | 53 |
| **[399] ETICS Meta-Data Software Editing - From Check Out To Commit Operations** | RONCHIERI, Elisabetta | 54 |
| **[417] EVIO - A Lightweight Object-Oriented Event I/O Package** | Dr WOLIN, Elliott | 55 |
| **[433] Embedding Python- a new approach to specifying program options** | Prof. BURNETT, Toby | 56 |
| **[439] Computationally efficient algorithms for the two-dimensional Kolmogorov-Smirnov test** | Dr REID, Ivan D. | 57 |

| | | |
|---|---|---|
| **[447] Implementing a Modular Framework in a Conditions Database Explorer for ATLAS** | AMORIM, Antonio | 58 |
| **[449] Fluka and Geant4 simulations using common geometry source and digitization algorithms** | GALLAS, Manuel | 59 |
| **[451] Parameterization of the LHCb magnetic field map** | Ms CONTI, Geraldine | 60 |
| **[458] The Distributed Parallel Multi-Platform ATLAS Release Nightly Build System** | EMIL, Obreshkov | 61 |
| **[460] Testing gLite for releases** | Mr UNTERKIRCHER, Andreas | 62 |
| **[462] Database architecture for the calibration of ATLAS Monitored Drift Tube Chambers** | Dr CIRILLI, Manuela | 63 |
| **[465] Track based software package for measurement of the energy deposited in the calorimeters of the ATLAS detector** | BACHAS, Konstantinos | 64 |
| **[32] Virtualization applications at the Brookhaven Computing Facility** | Dr CHAN, Tony | 65 |
| **[58] The Design and Implementation of BES Grid Computing System** | Prof. CHEN, Gang | 66 |
| **[59] Experience with monitoring of Prague T2 Site** | KOUBA, Tomas | 67 |
| **[67] The Tier0 road to LHC Data Taking** | Dr CASS, Tony | 68 |
| **[71] The ATLAS Software Installation System for LCG/EGEE** | DE SALVO, Alessandro | 69 |
| **[81] High Performance Storage Tests At The INFN Pisa Computing Centre** | Dr MAZZONI, Enrico | 70 |
| **[91] Service Level Status - a new real-time status display for IT services** | Mr LOPIENSKI, Sebastian | 71 |
| **[114] VINCI : Virtual Intelligent Networks for Computing Infrastructures** | Prof. NEWMAN, Harvey | 72 |
| **[141] Data storage layout and architecture of the German T1** | Dr RESSMANN, Doris | 73 |
| **[152] Portable Monitoring for Castor2** | COELHO DOS SANTOS, Miguel | 74 |
| **[154] A distributed approach for a regional grid operation centre** | Dr HERMANN, Sven | 75 |
| **[155] A Light-weight Intrusion Detection System for clusters** | EARL, Alasdair | 76 |
| **[160] A study of the accuracy of Network Time Protocol client synchronization in large computing clusters** | Dr GARFIELD, Nick | 77 |
| **[164] ATLAS Computing System Commissioning - Simulation Production Experience** | DE, Kaushik | 78 |
| **[169] The Swiss ATLAS Grid** | Mr HAUG, Sigve | 79 |
| **[183] Building a production-grade Grid infrastructure at DESY** | Dr GELLRICH, Andreas | 81 |
| **[188] An interface to tape for disk pool managers** | VAN WEZEL, Jos | 82 |
| **[214] Use of Cfengine for deploying LCG/gLite middle-ware** | Mr MOREY, Colin | 83 |
| **[226] Efficient, Large Scale Data Transfers in Wide Area Network** | Dr LEGRAND, Iosif<br>VOICU, Ramiro | 84 |
| **[230] The ATLAS Canada Network** | Mr GABLE, Ian | 85 |
| **[234] FermiGrid - Experience and Future Plans** | Dr KEITH, Chadwick | 86 |
| **[238] Integrated RT-AT-Nagios system at BNL USATLAS Tier1 computing center** | WLODEK, Tomasz | 87 |
| **[245] Metropolitan Area Network Support at Fermilab** | Mr DEMAR, Philip | 88 |
| **[247] End-to-End Network/Application Performance Troubleshooting Methodology** | Dr WU, Wenji | 89 |

| | | |
|---|---|---|
| **[250] Use of Flow Data for Traffic Analysis and Network Performance Characterization** | Mr BOBYSHEV, Andrey | 90 |
| **[252] CMS Software Deployment on the Open Science Grid (OSG)** | Dr KIM, Bockjoo Kim | 91 |
| **[261] Monitoring a WLCG Tier-1 computing facility aiming at a reliable 24/7 service** | Dr HEISS, Andreas | 92 |
| **[288] Exercising CMS dataflows and workflows in computing challenges at the Spanish Tier-1 and Tier-2 sites** | Dr HERNANDEZ, Jose | 93 |
| **[289] Experience Running a Distributed Tier-2 for the ATLAS Experiment** | Mr MARCH, LUIS | 94 |
| **[290] CMS Tier0 - design, implementation and first experiences** | HUFNAGEL, Dirk | 95 |
| **[291] Beyond Grid Security** | Mr HOEFT, Bruno | 96 |
| **[293] Initial results from the MAGIC-II Datacenter at PIC** | Prof. DELFINO REZNICEK, Manuel | 97 |
| **[300] Optimization of dCache MSS tape efficiency through Virtual Volumes** | Prof. DELFINO REZNICEK, Manuel | 98 |
| **[309] Creating End-to-End Guaranteed Bandwidth Network Paths Across Multiple Domains with TeraPaths** | Dr YU, Dantong<br>Dr KATRAMATOS, Dimitrios<br>Dr MCKEE, Shawn | 99 |
| **[323] Preparation for WLCG production from a Tier-1 viewpoint** | Mr BLY, Martin | 100 |
| **[353] US CMS Tier-2 Computing** | BLOOM, Kenneth | 101 |
| **[363] User Centric Monitoring (UCM) information service for the next generation of Grid-enabled scientists** | Dr ALEXANDER, David | 102 |
| **[370] Development of the Tier-1 Facility at Fermilab** | FISK, Ian | 103 |
| **[375] A Scientific Overview of Network Connectivity and Grid Infrastructure in South Asian Countries** | Mr KHAN, Shahryar | 104 |
| **[386] The US LHCNet Network for HEP** | NAE, Dan | 105 |
| **[388] HLRmon: a Role-based Grid Accounting Reporting Web Tool** | Mr FATTIBENE, Enrico<br>Mr PESCARMONA, Federico<br>Mr MISURELLI, Giuseppe<br>Mr DAL PRA, Stefano | 106 |
| **[394] Farm Logbook, a tool to keep/trace all operations on a big computing farm** | Mr ITALIANO, Alessandro | 107 |
| **[400] INFN Tier-1 status report** | DELL'AGNELLO, Luca | 108 |
| **[410] Construct an LHC scale national analysis facility** | Mr GASTHUBER, Martin | 109 |
| **[419] Circuit Oriented End-to-End Services for HEP Data Transfers** | BARCZYK, Artur | 110 |
| **[459] Release Management - the EGEE project's approach** | Dr KEEBLE, Oliver | 111 |
| **[464] The Status of Grid for Belle Experiment** | IWAI, Go | 112 |
| **[466] GridKa Tier1 Site Management** | Dr GABRIEL, Sven | 113 |

# Tuesday, September 4, 2007

**Poster 1: Day 2 (8:00 AM - 6:00 PM)**
