

# **The issue of delegation with proxy certificates**

Steffen Schreiner, GDB meeting, TEG Security Status  
CERN, 14<sup>th</sup> of December

# Delegating a Grid job in the WLCG

---

# Explicit and definite delegation ( who + what/to whom + how )

---

**MySwissBank**

**123 Somewhere In Town**

**CH-120X Maybe Geneva**

**Date: 14<sup>th</sup> of December 2011, 11:05 am.**

## **To Whom It May Concern:**

**I, Steffen Schreiner, hereby authorize ..... to order  
transactions in favor of Ms. Mickey Mouse, Mr. Obi-Wan Kenobi, or  
Mr. Tinky-Winky with regards to my Bank Account No. 123456789 up  
to a limit of 900 CHF total per month.**

**This authorization is valid for 3 month.**

**Respectfully yours,**

*Steffen Schreiner*

**(Name & signature of authorized person) .....**

# Almost explicit delegation ( who + (what) )

---

**MySwissBank**

**123 Somewhere In Town**

**CH-120X Maybe Geneva**

**Date: 14<sup>th</sup> of December 2011, 11:05 am.**

## **To Whom It May Concern:**

**I, Steffen Schreiner, hereby authorize ..... to claim my  
checkbook and to represent me in my banking transactions with  
regards to my Bank Account No. 123456789 without any limits.**

**This authorization is valid for 1 year.**

**Respectfully yours,**

*Steffen Schreiner*

**(Name & signature of authorized person) .....**

# Full delegation ( whoever + whatever )

---

MySwissBank

123 Somewhere In Town

CH-120X Maybe Geneva

Date: 14<sup>th</sup> of December 2011, 11:05 am.

## To Whom It May Concern:

I, **Steffen Schreiner**, hereby authorize ***ANY HOLDER OF THIS LETTER*** to act regarding any kind of actions in my behalf and to represent me in my banking transactions with regards to all my bank accounts without limits, further identification, authorization or tracking.

**This authorization is valid for 24h but can be refreshed within validity.**

**Thank you.**

**Respectfully yours,**

*Steffen Schreiner*

# The grey area of full delegation

# The issue of full delegation vs. accountability/traceability

---

Why do we need the user proxy for a pilot payload ?

- ▶ Because we don't want to fully trust the VO ?
- ▶ But we already rely on the VO to provide the correct proxy!
- ▶ How much does the presence of a proxy actually prove?
- ▶ At the same time the presence of a proxy is a risk...

We rather need something better.

# A proposal: Explicit/Definite Delegation

---

Signed Grid jobs ( in ALICE we are working on that )

This should be...

- ▶ a lot easier
  - ▶ in development / maintenance (one concept from users to sites)
  - ▶ in operation (no callbacks or add-ons / externals)
- ▶ explicit, so there is proof in the end what was submitted
- ▶ without any other permission delegated/passed on
- ▶ gLExec could easily support this ( generally green light )
