---

Good Afternoon.

My name is Luz Stella Gómez.

I am Physicist. My Ph.D. was developed as a member of the ATLAS collaboration in 2014, analyzing the experiment data. I worked directly at DESY (Zeuthen - Germany).
Currently, I am a Professor of the Sergio Arboleda University, located in Bogotá.
As researcher, I am very enthusiastic to promote the technological and scientific development of my country, Colombia. I really think that things can improve here. For this reason, I am very interested in the SHiP work. I am the leader of a group, and right now we have the support of the University for going ahead with the process to contact you. I would need to know the requirements in order to belong to the SHiP collaboration. I mean, the requirements and procedure to subscribe my University as a part of the collaboration, being myself the responsible and the group leader.

I appreciate any information you can give me about, and really hope to keep in touch with you.

Thank you very much,

Luz
