Common resource calculation model: Brainstorming/Hackathon

Wednesday 28 March 2018 14:50 (30 minutes)

How to estimate resource needs for run periods.
From several Excel sheets to a generic Python code with different configuration parameters by experiment.

Starting from a simplistic Python script (needs to be prepared)
Discussion and work on the code

Presenter: SARTIRANA, Andrea (Centre National de la Recherche Scientifique (FR))

Session Classification: Performance and Cost Modeling Introduction
