Slide from last week's MB

Q1 2007 - Tier0 / Tier1s

1. Demonstrate Tier0-Tier1 data export at **65%** of full nominal rates per site using experiment-driven transfers
 - Mixture of **disk / tape** endpoints as defined by experiment computing models, i.e. 40% tape for ATLAS; transfers driven by experiments
 - Period of at least one week; daily VO-averages may vary (~normal)
2. Demonstrate Tier0-Tier1 data export at **50%** of full nominal rates (as above) in conjunction with T1-T1 / T1-T2 transfers
 - Inter-Tier transfer targets taken from ATLAS DDM tests / CSA06 targets
3. Demonstrate Tier0-Tier1 data export at **35%** of full nominal rates (as above) in conjunction with T1-T1 / T1-T2 transfers **and** Grid production at Tier1s
 - Each file transferred is read at least once by a Grid job
 - Some explicit targets for WMS at each Tier1 need to be derived from above
4. Provide SRM v2.2 endpoint(s) that implement(s) all methods defined in SRM v2.2 MoU, **all critical** methods pass tests
 - See attached list; Levels of success: threshold, pass, success, (*cum laude*)

Data rates - for each site

Based on the data rates for 2008 in the Megatable ([link](#))

Targets to be achieved by June 07

CMS

65% Tier-0 → Tier-1 peak rate	for a week
Tier-1 → each Tier-2 sustain 10 MB/s	for 12 hours
Each Tier-2 → Tier-1 sustain 5 MB/s	for 12 hours

Aggregate for the Tier-1, SIMULTANEOUSLY:

Tier-0 → Tier-1 – 50% of average rate	for 12 hours
Tier-1 → Tier-2s – 50% of sum of average rate	for 12 hours
Tier-2s → Tier-1 – 50% of sum of average rate	for 12 hours

ATLAS

65% Tier-0 → Tier-1 peak rate	for a week
Tier-1 → each Tier-2 sustain 65% peak rate	for 12 hours
Each Tier-2 → Tier-1 sustain 65% peak rate	for 12 hours

Aggregate for the Tier-1 SIMULTANEOUSLY:

Tier-0 → Tier-1 – 50% of average rate	for 12 hours
Tier-1 → Tier-2s – 50% of sum of average rate	for 12 hours
Tier-2s → Tier-1 – 50% of sum of average rate	for 12 hours

Site Reliability – Tier-0, Tier-1

- 2007 SAM targets monthly average
- Target for each site
 - 91% - by Jun 07
 - 93% - by Dec 07
- Taking 8 best sites
 - 93% - by Jun 07
 - 95% - by Dec 07
- Tier-2s – Begin reporting the monthly averages, but do not set targets yet

Other Site Milestones in 2007 (i)

- **24x7 milestones**
 - Definition of the levels of support and rules to follow, depending on the issue/alarm February
 - Support and operation scenarios tested April
- **VOBoxes**
 - Service level, backup and restore defined March
 - VOBoxes service implemented at the site April
- **Job Priorities**
 - Mapping of the Job priorities on the batch software of the site April
 - Configuration and maintenance of the jobs priorities as defined by the VOs June
- **3D Service milestones**
 - Oracle Service in production, and certified by the experiment(s) - streams interventions CERN working-hours only February
 - Conditions DB in operations (ATLAS, CMS, and LHCb) April

Other Site Milestones in 2007 (ii)

- **Procurement**
 - At the beginning of each quarter the capacity required by the experiments (as defined in Harry's table) installed and in production
- **Once the Storage Systems have SRM 2.2 certified then we will agree dates for each site to provide:**
 - SRM 2.2 endpoint with storage classes as specified in the Megatable
