

# EMB/EDM: Introduction

---

## ❖ Addition to EMB:

- Vivek Jain has agreed to co-chair the EMB starting 1 March 2011

## ❖ Agenda items:

- I will cover briefly the recent pileup size estimates from Thomas Kittelmann
- Truth size is becoming important with pileup - need to follow this up
- Trigger: (Fabrizio) will have next round of changes in for rel 17 (~1 month)
  - Includes removing old types and optimizations

# Introduction (2)

---

## ❖ Agenda items, cont:

- Tracking is clearly the leader in size:
  - Number of parameter points for TrackParticle?
  - Persistency optimization - in release?
- Status of persistent layout from Peter

## ❖ Removing backwards compatibility

- readRDO/ESD/AOD and other derived format from Christmas 2009 reprocessing onwards (release 15.5.4)
- Need to do this in next month
- We should try and review what can be removed.
