DH and research data

- **DH projects reuse data:**
 - Digital archives as data: text files extracted from a corpus of texts by OCR
 - Text mining
 - Digitized manuscripts transcriptions
 - Geospatial data
 - Oral history sounds files and transcripts
 - Archival metadata
- **DH projects produce data:**
 - Databases
 - Data visualization
 - Interactive maps
 - Timelines

A challenge for research: preserving data

- « For papers where the authors gave the status of their data, the odds of a data set being extant fell by 17% per year. In addition, the odds that we could find a working e-mail address for the first, last, or corresponding author fell by 7% per year. »

Priorities for 2023

Support archive management:

- Improving collection processes for paper and digital administrative archives
- Focus on the collection and long-term preservation of research archives
- Publish conservation repositories
- Data recovery, archive software tools and applications decommissioned by the IT Department, and define specifications for future digital transfers of new tools deployed as part of the IT master plan.

Reporting and dissemination :

- Selection and arrangement of archives that have become historical since their arrival at SARA
- Support and provide training in the cataloguing of archive materials within the SorbonNum program
- Develop archival description and processing in Calames

Today's mission: help manage records and build up the university's historical heritage
