

Spectrometer Solenoid Update

- A meeting was held at Wang NMR last week to discuss details of assembly of the magnets
- Dean Sorenson (retired cryotech from FNAL) visited LBNL and participated in the meeting – Dean is being hired by LBNL to assist with the assembly
- An LBNL cryotech (Dennis Callais) has also been brought into the project to help with the assembly
- Preliminary work at Wang started: design details for 5+1 layout, organizing of parts (preliminary inventory of parts completed)
- Vacuum vessel FEA completed at LBNL last week
- The FNAL vacuum system was added to LBNL's 3D CAD model
- Soren Prestemon will meet w/Vladimir Kashikhin this week to discuss their results for the quench analysis
- Sensitivity studies to be run soon
