Generating a timetable with the SPMS (1)

Due to the fact that working groups did not finish within a day a “normal” setup of a timetable was not possible, e.g. we did not want to have sessions like WG1-Tuesday, WG1-Thursday, WG1-Friday separated for each day

SPMS → Scientific Program Administration → Sessions

- ▶ With the setup above reasonable data extracts from the SPMS were impossible, like an overview of oral presentations, listing of abstracts by time etc.
- ▶ Workshop timetable has been defined alternatively with InDiCo

► Is it possible to generate such a timeable with the SPMS ?

Green dot – no more paper upload possible

If a paper of type “Transparencies” received a green dot by an editor the author cannot upload the corresponding paper any more

- ▶ a “disconnection” between papers and contributions of type transparencies might help – but how can this be realized within the SPMS ???
