Here is the status for the MB heads-up today, 24 July 2007:

Due 11/07 and completed by MB of 17 July:

SRM-01: done (FZK)
SRM-02: done (IN2P3)
SRM-05: done (CERN)
SRM-09: done (Edinburgh)

Due 11/07 and not completed by MB of 17 July:

SRM-08: done except storage tokens still to be configured (LAL)
SRM-03: done. Exposed known dcache bug keeping data as 'precious'
        after migration to hpss. Fix is already available (BNL)

Due 18/07:

SRM-04 done (SARA)
SRM-06 done (NDGF)
SRM-07 done. Both CASTOR and STORM endpoints published (CNAF)

Summary: all sites meeting the schedule.

Due 31/07:

SRM-10 testing experiment scenarios with experiment certificates
        - action on LHCb to assign lhcb/lcgprod role to Lana and Flavia
        (for Lana will be done today, 24 July)
        - Lana will send requested information today to LHCb so that they
can prepare for their testing
SRM-13 definition of tests, incl. SRM V1
        - See ATLAS and LHCb plans on GSSD page:
