

LHC Computing Grid

Status of LCG Resources Planning

Sue Foffano

Management Board

2nd October 2007

Current Status of Pledge information

- Initial request sent 24th August to:
 - Participants to Computing Resources Review Board (CRRB)
 - Copy to Collaboration board + GDB & MB members
 - Deadline for input 28th September
- All external T1 or T2 sites requested to update their pledges for 2008 to 2012 inclusive, and to prioritize allocation of the resources to the experiments for the reference year 2008 for October CRRB report
- In parallel experiments were asked to revise their requirements up to 2012 - all experiment replies were received by 18th September
- Status of request responses up to 14:00 (Geneva time) 2nd October:
 - 4/11 T1 sites have responded
 - 16/54 T2 sites have responded

Observations

- In cases where a site has replied, often the pledge values for 2011 and 2012 are the same as 2010
- A summary (Slide 4) shows the situation for 2008 including the split across experiments
- Pending missing input, a simulation summary (Slide 5) shows the situation from 2008-2012 if all sites who have not yet replied maintain their last pledge values up to 2012
- This shows major problems ahead, however it is hoped that the response rate will improve and new increased pledge values will project a better future....
