Job Priorities

Simone Campana

Current Status

- JobPriorities mechanism has been tested on SA3 Certification Testbed
  - Installed with a "branched" version of YAIM
  - No remaining issues to report

- Next steps:
  - Configuration of JP in 3 PPS sites
    - At least 1 Torque+Maui and 1 LSF
  - Testing with 2 Vos and 2 Roles/Groups per VO
    - And larger scale of tests (longer periods of time)

Current Status

- PPS sites have been installed.
  - Some configuration issues have been spotted and cured promptly
    - Not related with JP

- Current showstopper I fear is ME.
  - Had no time to carry on more extensive testing.
  - Will try to do it this week, in collaboation with Andrea Sciaba (CMS)
