

Studies of breakdowns at high-gradients in TBTS/CTF3

Tuesday, 5 November 2013 09:30 (30 minutes)

Breakdown studies and results in Two-Beam Test Stand in CTF3, where accelerating structures are being tested at gradients up to 150MV/m, will be summarized. The planned modifications will be outlined.

Presenter: DUBROVSKIY, Alexey (Joint Inst. for Nuclear Research (RU))

Session Classification: Experimental 1 - rf systems
