CERN accelerator ride - animation

Proton Synchrotron Booster
Injecteur du synchrotron à protons

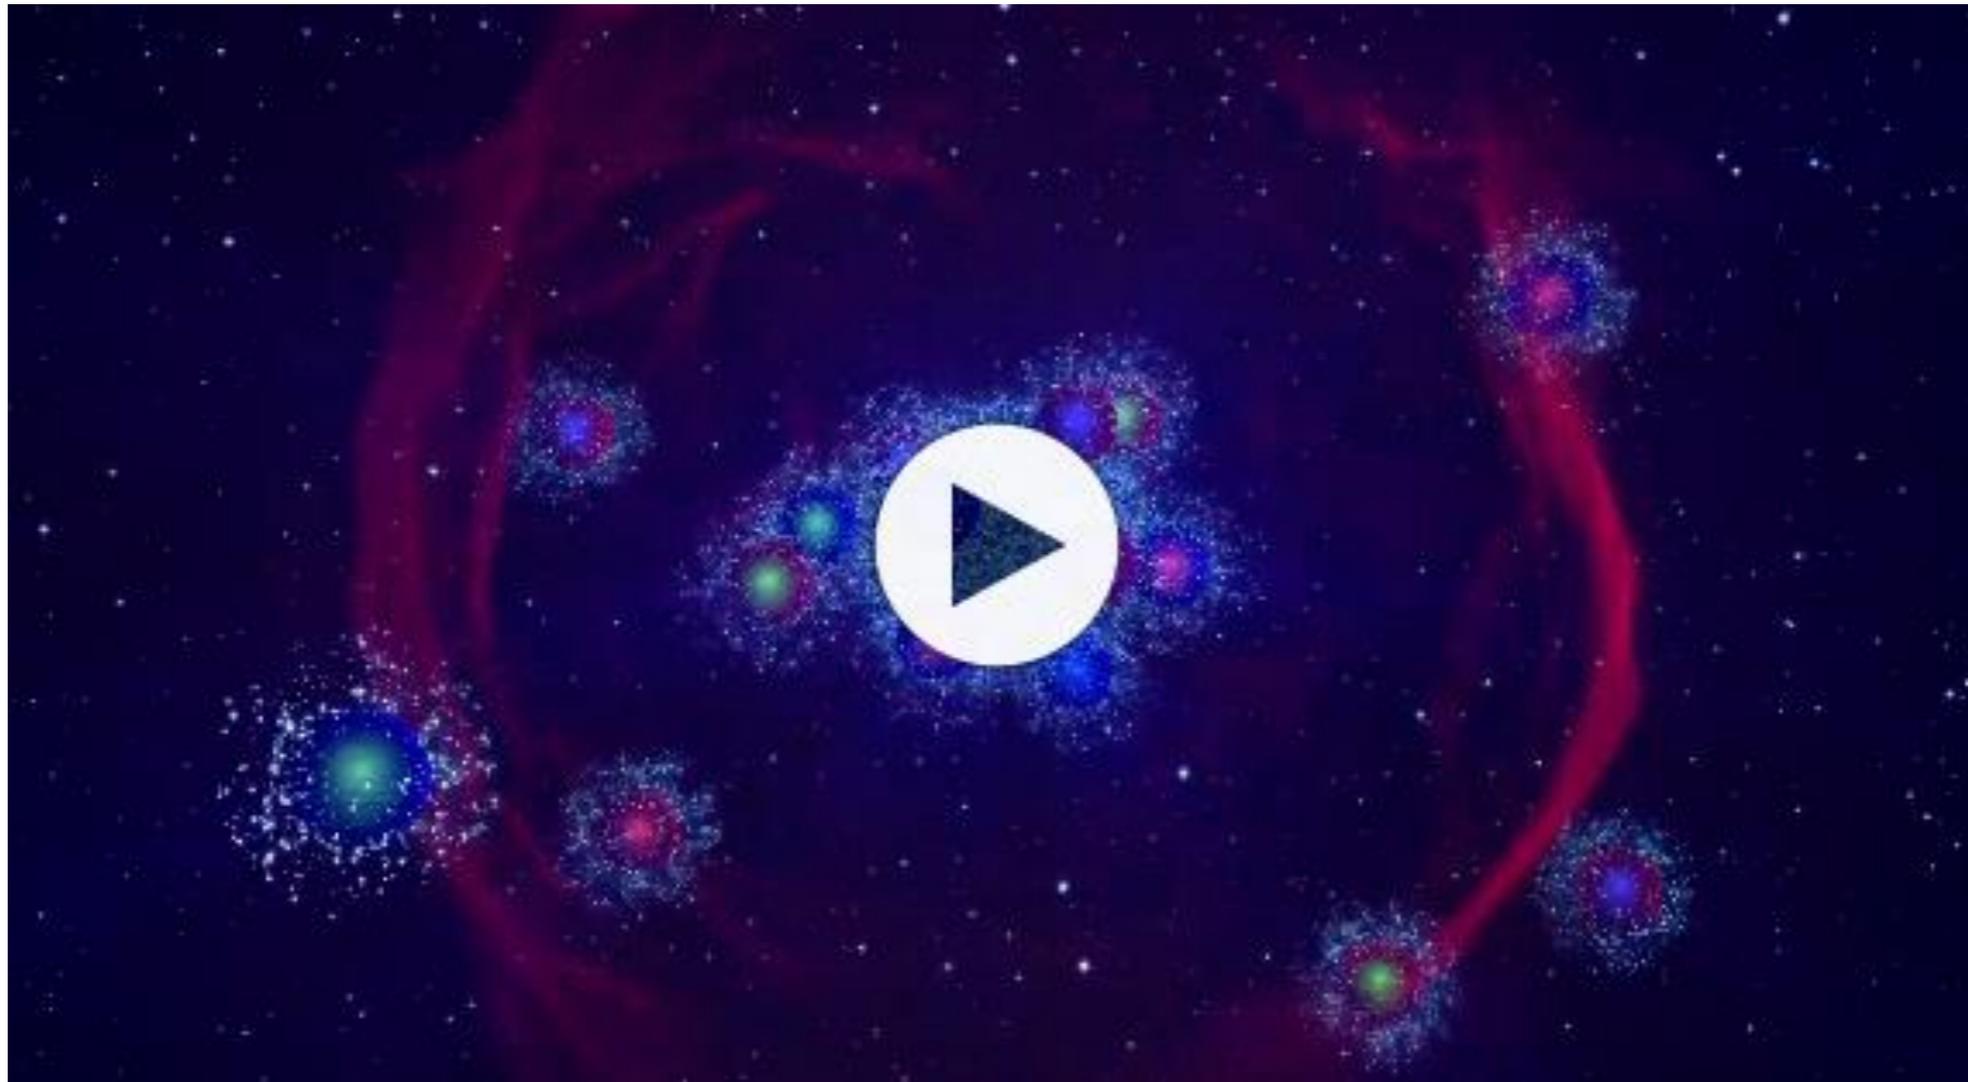

Teaching resources: Animations

Example: LHC and collisions in ATLAS detector

<http://cern60.web.cern.ch/en/cern-exhibitions-content>

Teaching resources: Animations

Example: Higgs boson production and decay

CERN data centre

Many animations about data analysis,
computing, storage, GRID

Synchrocyclotron: early history of CERN

12 minute video and projection mapping on SC about the creation, the early history and the first scientific discoveries of CERN

https://www.youtube.com/watch?feature=player_embedded&v=uw5ze9Svfvo

Interactive LHC tunnel

“Virtual visits” with schools

Video chats

About 100 / year

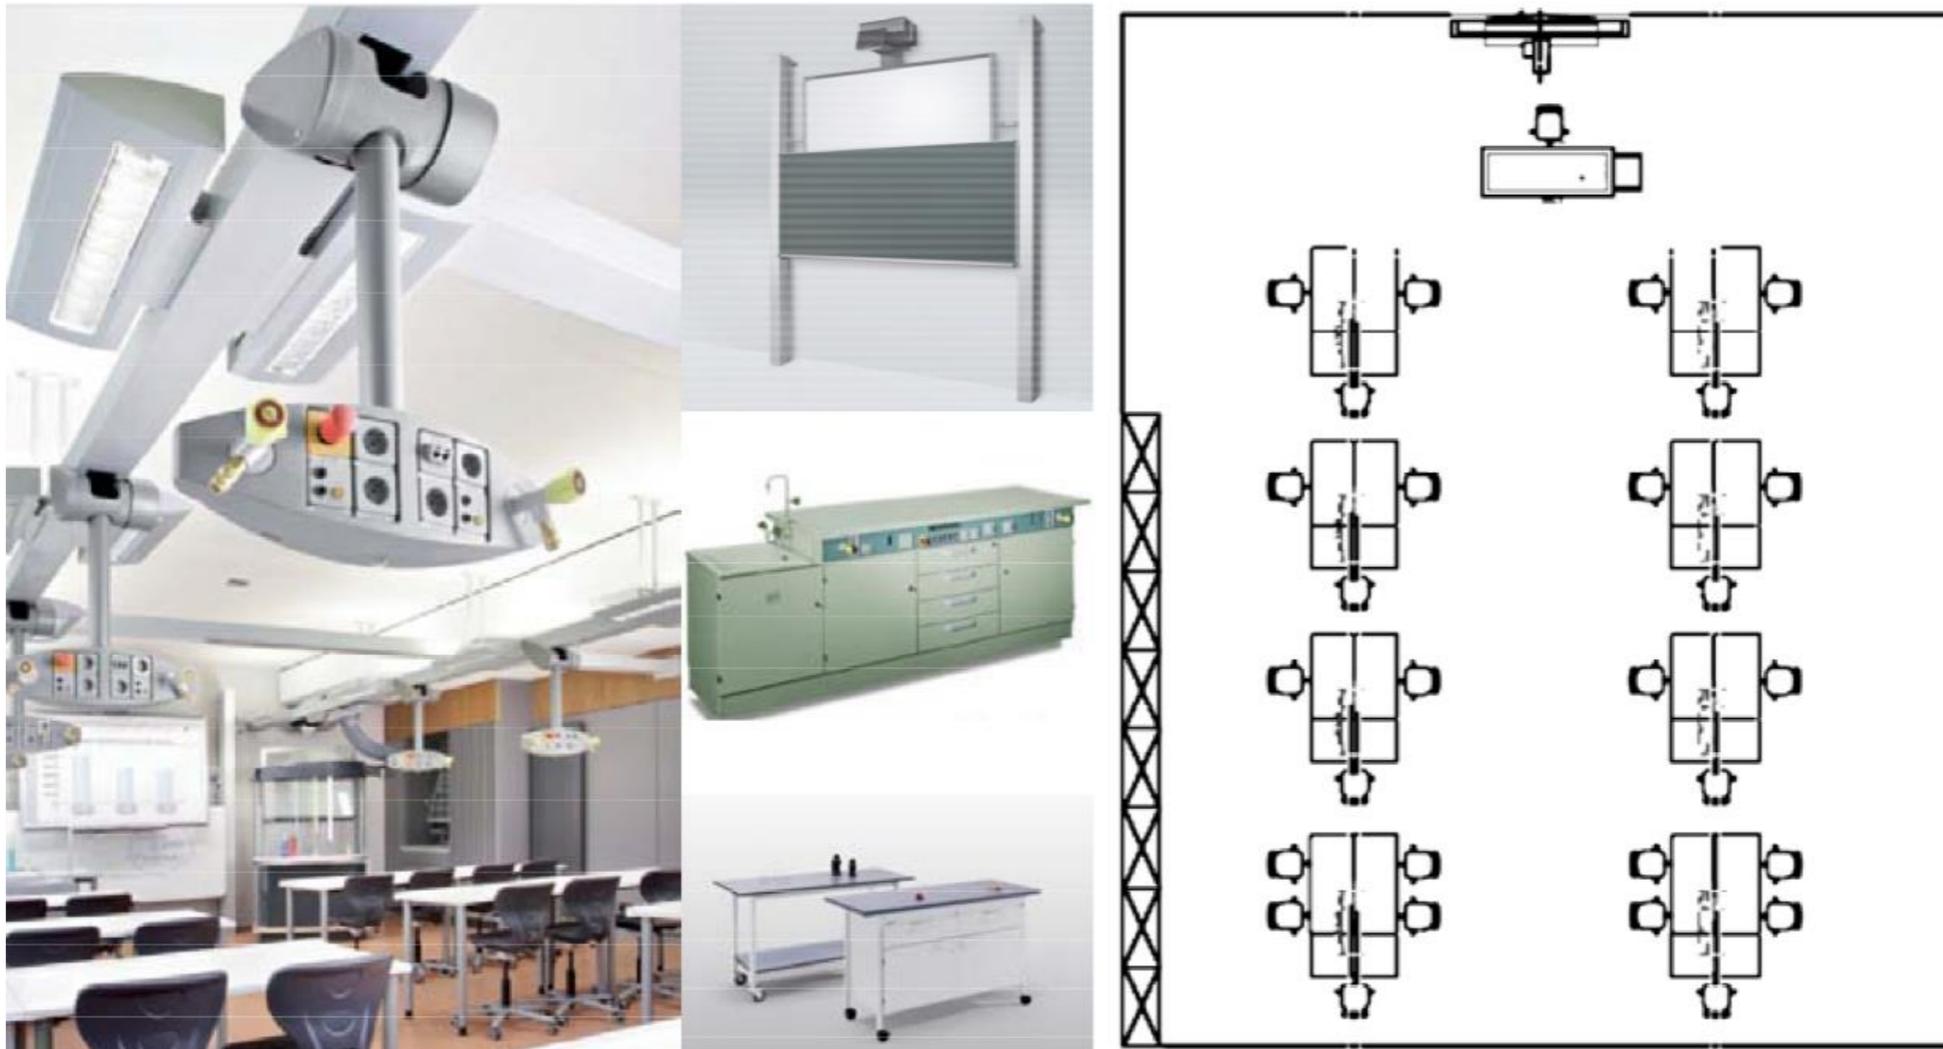

- Professional: Polycom/Tandberg
- Skype, EVO, Google+
- Excellent feedback

Google + ‘hangouts’

From ATLAS, CMS, CCC

- Questions and Answers
- Talking to ‘real’ LHC physicists !

2014: CERN S'cool Lab

Modern physics experiments

Photoelectric effect

Rutherford experiment

Radioactivity

Franck-Hertz

Electron diffraction

Cloud chambers

Pixel detectors (MediPix)

Cosmic ray detectors

X-ray scattering

Superconductivity

high T_c materials

Up to 30 students

Teacher + 2 supervisors

**Also: remote connection via
videoconference !**

Teaching Resources for the class room

Lesson plans

- Antimatter
- Cosmic Rays
- Dark matter
- more to come

Posters

- Cosmic evolution
- Standard Model
- Collisions, aerial views

What happened to antimatter? - Rolf Landua

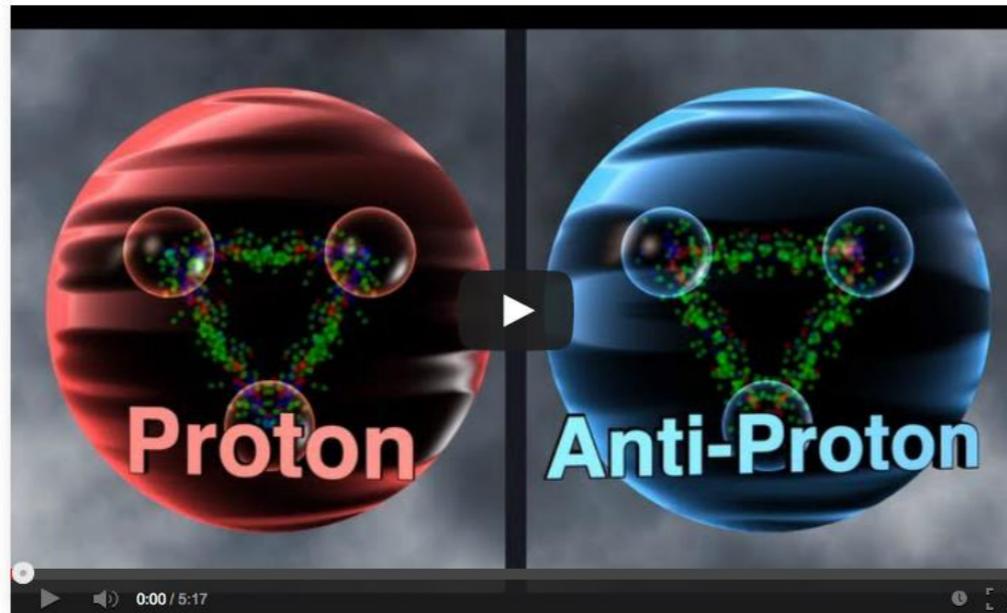

206,171 Views

487 Questions Answered

Let's Begin...

Particles come in pairs, which is why there should be an equal amount of matter and antimatter in the universe. Yet, scientists have not been able to detect any in the visible universe. Where is this missing antimatter? CERN scientist Rolf Landua returns to the seconds after the Big Bang to explain the disparity that allows humans to exist today.
