

IOP HEPP Particle Physics 2008

Tuesday, 1 April 2008

Parallel 2A: Collider Physics - Higgs - George Fox Lecture Theatre 1 (11:00 - 12:30)

time	[id] title	presenter
11:00	[19] The Search for Higgs in the $W+W-$ Decay Channel at the CDF detector at Fermilab	Mr DAVIES, toby
11:13	[73] Search for Associated Production of Z and Higgs Bosons in $nunu$ bb Final States	Mr CHRISTOUDIAS, Theo
11:26	[31] Weak boson fusion	PALMER, Sophy
11:39	[24] Searching for a Higgs Boson in the channel $ttH(H \rightarrow bb)$ with the ATLAS detector	Ms ASQUITH, Lily
11:52	[77] Higgs self coupling sensitivity at ILC	Mr FAUCCI GIANNELLI, Michele
12:05	[58] Higgs studies at a future electron-positron collider	GRIMES, Mark
12:18	[89] Small x gluon from exclusive J/ψ production	Ms NOCKLES, Cathy
