and Media

- **Current status**
  - Prototype code ready and available.
    - Developed in OMII-EU
  - Needs to be updated to production quality.

- **This will be done in EGEE 3**

- **The plan was:**

- **Phase 1:**
  - The server will be able to also accept SSL connections.
    - Done in 1.8

- **Phase 2:**
  - The clients (and APIs) will only speak SSL
    - Will be done in 1.9. Timescale: End of 2008

- **Phase 3:**
  - The server will speak only SSL.
    - Will be done in 2.0

- **Still on track!**

- **JSPG put some requirements on the registration interface of VOMS-Admin**
  - AUP acceptance, suspension of users, etc…
  - They will be implemented in Voms-Admin 2.5. Due out at the end of EGEE 2

- **Several requirements to allow multiple certificates to be associated to the same user:**
  - Renewal of certificates, anonymization, users with certs from multiple CAs…

  - Coding completed, now in the testing and debugging phase.
    - Will be available in Voms-Admin 2.5 and Voms 1.8
  - Due out at the end of EGEE 2
