Enabling Grids for E-sciencE

- **Pseudonymity Service provides pseudonym credentials**
  - Short-live X.509 certificate with pseudonymous subject DN
- **Pseudonyms are registered to VOMS as aliases to the "real" certificates**
  - The similar VOMS ACs can be assigned and embedded inside "pseudo proxies"

Enabling Grids for E-sciencE

- **The first working prototype ready**
  - The source codes are about to be committed to JRA1 CVS
    - Pseudonymity service: org.glite.pseudo.server
    - Client-tool: org.glite.pseudo.ui
    - (Message-schemas etc: org.glite.pseudo.interface)
- **All the unfinished tasks (e.g. documentation) ready before the end of EGEE-II**
