

gLExec deployment update

WLCG Management Board, 15th Apr 2014

Maarten Litmaath
IT/SDC

Deployment status for sites

<https://twiki.cern.ch/twiki/bin/view/LCG/GlexecDeploymentTracking>

- It shows the status of the gLExec tests per site per supported VO **on the given date**
 - Record of the situation at that time
 - The color **cyan** indicates a successful test
 - The service may have deteriorated since
 - Most instances only used for testing so far
- Click on the links in a VO's cell to see the latest results
- **95** tickets opened on July 1, **16** still open
 - See page 12 for further details

Notes about sites

- Various ALICE sites do not have CEs
 - Currently cannot be tested → no ticket
- Various ATLAS sites intend to use ARC CEs
 - ARC Control Tower v2 to handle traceability
- ATLAS OSG sites to be handled by USATLAS
- A few sites use the log-only mode
 - Better than nothing
- A few tickets are stuck on technical issues
- A few tickets got very little attention

Deployment status for experiments

- CMS are close to making their gLExec tests critical
 - Scheduling at T1 sites should be solved now
- LHCb presumably ready for using gLExec
 - On sites where it works
- ATLAS
 - Thousands of analysis and production jobs successfully executed on ANALY_CERN_GLEXECDEV PanDA queue
 - gLExec code being merged into pilot head
 - Release expected soon
 - Systematic HammerCloud tests on real queues next
- ALICE need to adapt AliEn
 - Concept is not contested
