

11th Vienna Conference on Instrumentation - VCI 2007

Monday, 19 February 2007

Session 2 - HS1 (14:00 - 18:30)

| time | [id] title | presenter |
|-------|--|----------------------|
| 14:00 | [44] Satellite-borne and cosmic-ray detectors | TAJIMA, Hiroyasu |
| 14:50 | [26] The Antares readout front end electronics and DAQ | DRUILLOLE, Frédéric |
| 15:15 | [70] The neutrino oscillation OPERA experiment Target Tracker | DRACOS, Marcos |
| 15:40 | Coffee break | |
| 16:10 | [63] A scintillator tile hadron calorimeter prototype with novel SiPM readout for the ILC | DANILOV, Mikhail |
| 16:35 | [64] Single photon timing resolution and detection efficiency of the DASIPM silicon photo-multipliers | COLLAZUOL, Gianmaria |
| 17:00 | [15] Development and Study of the Multi Pixel Photon Counter | UOZUMI, Satoru |
| 17:25 | [6] The X-HPD: Development of a large spherical hybrid photodetector | JORAM, Christian |
| 17:50 | [8] Scintillation detectors for operation in high magnetic fields: recent developments based on arrays of avalanche microchannel photodiodes | SCHEUERMANN, Robert |
