

Elementary constituents of matter

An educational poster about particle physics for high-school teachers & pupils

French partners of the project

Partner for international circulation

- **Original version in French (2014)**
- **Update of a poster created in 2005 for the International Year of Physics**
→ **Main addition: the Higgs boson**
- **Design by a multidisciplinary team: physicists, teachers, outreach experts and a graphics designer**
- **National and international scope**
 - **Dissemination in 1100+ French high-schools with an educational leaflet**
 - **Poster available in many languages – nine so far**
→ Arabic, English, French, German, Hebrew, Italian, Portuguese, Slovak, Spanish

- **Cannot see your favourite language here?**
- ① **Contact us; you will receive a pdf form to translate each text block**
- ② **We will take care of the layout, inserting your logo(s)**
- ③ **You will receive an HD JPEG poster in your language, free to use for educational purposes**
