

DPF 2009**Monday, 27 July 2009****Neutrino Physics I (14:00 - 18:30)**

time	[id] title	presenter
14:00	[28] Neutrino Oscillations: Beams and Reactors	BISHAI, Mary
14:30	[175] Neutrino Oscillations: Atmospheric and Solar	WENDELL, Roger
15:00	[138] Solar Neutrino Measurements at Super-Kamiokande-III	YANG, Byeongsu
15:20	[323] Recent atmospheric neutrino results using the SK-I, SK-II, SK-III datasets	RAAF, Jennifer
15:40	[133] Search for electron neutrino appearance in the MINOS experiment	PATTERSON, Ryan
16:30	[143] Identifying Electron Neutrino Events in MINOS	OCHOA, Pedro
16:50	[134] MINOS near-detector data decomposition and far-detector extrapolation	SWAIN, Sanjay
17:10	[239] First observation of NuMI anti-neutrinos by MINOS	Dr DANKO, Istvan
17:30	[169] Analysis of Neutral Current Interactions in MINOS: A Search for Sterile Neutrinos	Dr SOUSA, Alexandre
17:50	[370] The NOvA Experiment	NORMAN, Andrew
18:10	[273] Overview of the T2K long baseline neutrino oscillation experiment	Mr LE, TRUNG
