LHCb report

Bolek Pietrzyk LAPP, Annecy

LHCb expositions

New "final" panels have been installed near our control room (P8).

LHCb expositions

Central panels at the P8 exposition are reserved for screens:

- virtual visit of LHCb
- LHCb, CPS, SPS, LHC status
- live event display
- slide show of our
 First Beam day
 events,
 later some
 historical events
 of our big discoveries

LHCb expositions

The P8 exposition has been moved to bld. 40.

LHCb maquette

The model of LHCb detector has been constructed for the Technical Museum of Catalonia. We have ordered two for CERN: for P8 and bld. 40.

EPPO Oct. 3rd, 2008

September 10th

First beam day

EPPO Oct. 3rd, 2008

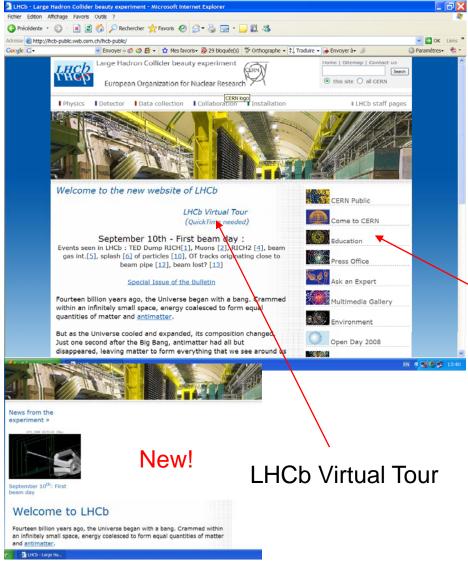

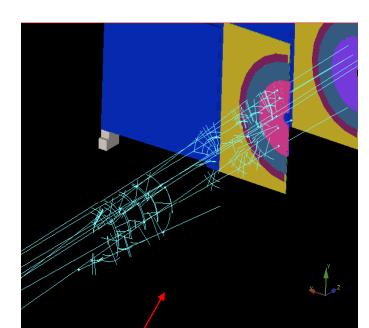

LHCb leaflet, LHC brochure

Work is going on

- LHC brochure for the LHC official inauguration (Oct. 21st)
 "Carnet de voyage" is ready
- LHCb leaflet is in preparation
- October 21st

EPPO Oct. 3rd, 2008

Longer term plans

Strengthen and improve what has been started ...

collection, upgrade and maintenance of exhibit material, promotion of flavour physics, preparation of written information for different interest groups ...

try to improve content, organisation and beauty of our Web pages, both public and LHCb staff

make the LHCb physics results accessible and put them into context of general physics and society

we are very happy that the partnership with the CERN outreach is so good (LHCb expositions, leaflet, brochure, public Web pages,)
