

**THE CERN MODEL, UNITED NATIONS AND GLOBAL PUBLIC GOODS:
addressing global challenges**

Palais des Nations, room XII – Geneva – 2 November 2015

Master of ceremony: Ms. Sigrun Habermann-Box, UNOG

A G E N D A

With the view to contribute to the realization of the 2030 Agenda for Sustainable Development, which was approved on 25 September by the United Nations Member States, this one-day symposium co-hosted by the United Nations Office at Geneva and CERN, with the support of Switzerland and France in their capacity as the two CERN host states, will explore the value of the CERN model of cooperation in building trust across boundaries and strengthening the provision of global public goods in a rapidly-changing international context. The event will bring together policy makers, scientists and representatives of civil society in a new debate about how to build synergies across communities to move forward global objectives. The aim is to stimulate an innovative exchange that can help to shape more creative approaches and partnerships in addressing the challenges of today.

- 9:15 – 9:30 Welcome by:
