Reorganisation in CERN IT Department

15 Nov 2013

Ian.Bird@cern.ch

IT Reorganisation

- From January 2016 there are some changes inside the CERN IT Department
 - Full structure visible at <http://information-technology.web.cern.ch/about/organisation>
- Aims
 - To integrate WLCG activities better with rest of the Department
 - Consolidate some activities
- From the WLCG point of view (experiments, other sites)
 - No change in terms of services, support lines, tickets, etc

Main changes (FYI)

- CM Group – Tim Bell
 - Cloud and Batch teams integrated
 - Also monitoring (internal and dashboards) integrated team
 - Configuration
- ST group – Alberto Pace
 - Previous DSS
 - Grid DM teams from SDC (FTS, etc)
- SDC, PES group no longer exist

Change of roles for WLCG

- Helge remains as Tier 0 manager – to ensure coordination of all Tier 0 concerns
 - Helge will be responsible for all deployment aspects of HNSciCloud (and similar activities) – coordinating between experiments, IT, and procurement teams
- Key WLCG roles of CERN contribution to WLCG Operations and experiment liaisons in a team now led by Julia Andreeva
 - This does **not** change the collaborative operations coordination activity, simply regroups the CERN contributions
- Markus leads a new team investigating and understanding performance of applications, sites, and the infrastructure – intended as core of a collaborative activity.
