

Tier 1 Requirements

- CERN + Tier 1 will need to play a crucial role interfacing between current IPv4 only sites and new IPv6 only sites.
- Have been asked for a long time to provide dual stack performance box.
 - Ticket them now?
 - Regular review of performance at meeting?
- Those providing CVMFS Stratum 1 to make dual stack by April 2017.
- New: Assume all other external services (e.g. Bdi, GGUS, GOCDDB) should be made dual stack by April 2017.
 - If not possible, there should be a decommission plan for service.
- New: Should provide functional dual stack access to storage:
 - 1GB/s and 90% availability by April 2017.
 - 10Gb/s and 95% availability by April 2018.
