

Eldar Ganiev

Eldar was born in Kazakhstan, but moved to Russia with his family when he was a child. After High school he was applied to Physics Department of Novosibirsk State University. During bachelor study period he chose High Energy Physics as specialization. Now he is second year Master student of Novosibirsk State University. During his summer at CERN Eldar has been working in the ATLAS Experiment (EP-UAT). The goals of his project have been: 1. Events selection criteria, which were described in the note (ATL-COM-PHYS-2016-839), application; 2. Analysis validation and comparison of results with the note; 3. Atlas style application to all pictures drawing and automation of the procedure; 4. Cut flow tables; 5. Events selection variation to study the systematical uncertainties. After his internship at CERN Eldar is going back to NSU to finish his work on a Master's thesis.
