

Machine Detector Interface

Thursday, 9 March 2006 16:30 (20 minutes)

An over view of MDI issues will be presented. Forward detectors was covered by Klaus Moenig, and machine-specific issues will be covered by Andei Seryi in the GDE plenary session. This talk will focus on detector-related issues such as the DID (detector-integrated solenoid) and detector IR design.

Presenter: , Hitoshi Yamamoto (Tohoku Univ.)

Session Classification: Plenary

Track Classification: Plenary
