

ISAPP 2017 Texel: The Dark and the Visible Side of the Universe

Monday, 26 June 2017 - Wednesday, 5 July 2017

Texel, Netherlands

Scientific Programme

The scientific programme will cover the following topics:

Cosmic-rays sources and acceleration, propagation and detection

Gamma-ray astrophysics and high-energy neutrinos

Dark matter candidates, distribution and indirect searches

LHC constraints on dark matter and astroparticle statistics

A more detailed description of the above topics will follow at a later date.
