ICFA ABDW #49 ECloud 2010

Karl Smolenski

Mark Palmer

Cornell University

Laboratory for Elementary-Particle Physics

- October 8-12, 2010
- Expecting 80-100 attendees
- Emphasis on mitigation methods for damping rings, super B-factories, and the LHC upgrade.
- All talks invited by program committee, evenly distributed by lab, region, and topic.
- Individual paper for each talk, in advance, full proceedings with additional summary papers from working groups
- Satellite review meeting of ILC damping ring e-cloud mitigation design.
