

Retrieving and Processing Transparencies during a Conference

Michaela Marx, DESY

JACoW Team Meeting, November 2009, Hamburg, Germany

Retrieving and Processing Transparencies

- Overview -

- ▶ Retrieving the slides files
- ▶ Processing the slides
- ▶ Uploading the slides to the database
- ▶ User Guide
- ▶ Annoying things that could happen
- ▶ Time and effort of processing transparencies

Retrieving the slides – there are different ways

- ▶ Collect transparencies from the presenting authors, e.g. on USB sticks or
- ▶ download the slides from the SPMS (requires that the speaker already uploaded the talk)

Preferred method: Try to get the talks directly from the speakers preparation room

Speakers Preparation Room

Collaborations

- Research
- Teaching
- Outreach

SPMS overview of all oral presentations

▶ Listings of oral presentations can be extracted from the SPMS

Please note: The listings show only the already uploaded talks in the database and **NOT** the expected ones!

- ▶ SPMS ▶ General ▶ Data Extracts ▶ All Orals (EXCEL listing) or
- ▶ SPMS ▶ General ▶ Reports ▶ All Orals (HTML or CSV listing)

▶ Example HTML listing:

FEL 2009 Invited Orals			Michaela Marx	
			Logout Search My Schedule Home Find Profiles	
Paper ID	Type	Title	Speaker	Affiliation
MOOA01	Invited Oral	Stochastic Properties of Self-Amplified Spontaneous-Emission	Samuel Krinsky	Brookhaven National Laboratory (BNL) National Synchrotron Light Source
MOOA02	Invited Oral	Statistical Theory of the SASE FEL Based on the Two-particle Correlation Function Equation	Oleg A. Shevchenko	Russian Academy of Sciences (BINP SB RAS) The Budker Institute of Nuclear Physics
MOOB01	Invited Oral	Beam Echo Effect For Generation Of Short-Wavelength Radiation	Gennady Stupakov	SLAC National Accelerator Laboratory (SLAC)
MOOB02	Invited Oral	Towards sub-Angstrom coherent light sources: The Quantum FEL	Gordon Robb	University of Strathclyde (USTRAT/SUPA) Scottish Universities Physics Alliance Department of Physics
MOOB03	Contributed Oral	Deep Saturation Dynamics in a Free Electron Laser	Romain Bachelard	Synchrotron Soleil (SOLEIL)
MOOB04	Contributed Oral	Impact On A Seeded Harmonic Generation Fel Of An Initial Energy Chirp And Curvature In The Electron Bunch Energy Distribution	Alberto Andrea Lutman	University of Trieste (DEEI) DEEI Department

Processing transparencies – the main steps

Processing transparencies – the main steps

- ▶ PowerPoint (ppt) and PDF formats are allowed for authors, but **only pdf files can be published in the proceedings**
- ▶ Convert the PowerPoint Slides (PPT) to the portable data format (PDF). Check the PPT slides for overlapping contents by running PowerPoint. **If no overlaps, convert PPT transparencies to PDF by**
 - using PDFMaker or
 - using the generic postscript driver + distiller

- ▶ Save the slides as **Paper-ID_talk.pdf** and upload the file to the database

Processing transparencies – file upload

After the slides have been converted to PDF they need to be uploaded to the database server.

- ▶ Enter the appropriate Paper-ID in the search screen

FEL 2009 Search Michaela Marx

Final QA Pending	Registered
Publishable No, Publishable Status Code	Abstract The Linac Coherent Light Source (LCLS) is a SASE 1.5-15 Å x-ray Free-Electron Laser (FEL) facility under construction at SLAC*, and presently in an advanced phase of commissioning. The injector, linac, and new bunch compressors were commissioned in 2007 and 2008, establishing the necessary electron beam brightness at 14 GeV. The final phase of commissioning, including the FEL undulator and the long transport line from the linac, began in November 2008, with first 1.5-Å FEL light and saturation observed in mid-April 2009. We report on the accelerator, undulator, and FEL operations, including the new suite of x-ray diagnostics, which have just begun commissioning.

Processing Transparencies: A step-by-step guide

Author: Michaela Marx, DESY Hamburg, Germany, April 2009, Version 1.0

Since 2005 slides were an additional element presented in the JACoW conference proceedings. They were published on the JACoW web site and on the conference CD for the following conferences and workshops:

- ▶ DIPAC05
- ▶ FLS2006, EPAC06, FEL06, RUPAC06, ICAP06
- ▶ APAC07, PAC07, FEL07, COOL07, ICALEPCS07
- ▶ EPAC08, PCaPAC08, RUPAC08

This manual gives a detailed description on how to process conference slides ready for publishing. It is assumed that an SPMS database has been set up before you start processing the transparencies. Screen shots and examples in this manual are taken from previous conferences and workshops.

Contents

1 - Step-by-step guide	page 2
2 - The PowerPoint "Capture Show" add-in	page 5
3 - Examples	page 8
4 - SPMS setup (for conference administrators only)	page 10
5 - Remarks	page 11

Processing transparencies – User Guide

- ▶ A detailed User Guide for conference editors is available on the web

The screenshot shows the JACoW website interface. The left sidebar contains a navigation menu with categories like 'Award for the Collaboration', 'Scientific Programme Management System (SPMS)', 'For authors', 'For conference editors', 'For Libraries', and 'Physical Review'. The 'For conference editors' section is expanded, and 'Documentation' is highlighted with a red arrow. The main content area is titled 'Joint Accelerator Conferences Website' and lists various resources. The 'Processing Contributions to Proceedings' section is highlighted with a yellow oval, containing links for 'Guidelines for editors' for various conferences (EPAC'02, EPAC'04, DIPAC'05, EPAC'06, EPAC'08, PAC'09). Other sections include 'JPSP Scripts' and 'Background Information'. At the bottom, there is contact information for C. Petit-Jean-Genaz and B. Billen.

The document is titled 'Processing Transparencies: A step-by-step guide'. The author is Michaela Marx, DESY Hamburg, Germany, April 2009, Version 1.0. The text explains that since 2005, slides were an additional element presented in the JACoW conference proceedings, published on the JACoW web site and on the conference CD for the following conferences and workshops:

- ▶ DIPAC05
- ▶ FLS2006, EPAC06, FEL06, RUPAC06, ICAP06
- ▶ APAC07, PAC07, FEL07, COOL07, ICALEPCS07
- ▶ EPAC08, PCaPAC08, RUPAC08

The manual provides a detailed description of how to process conference slides ready for publishing. It is assumed that an SPMS database has been set up before you start processing the transparencies. All provided screen shots and examples in this manual are taken from previous conferences and workshops.

Contents

- 1 - Step-by-step guide page 2
- 2 - The PowerPoint "Capture Show" add-in page 5
- 3 - Examples page 8
- 4 - SPMS setup (for conference administrators only) page 10
- 5 - Remarks page 11

▶ <http://accelconf.web.cern.ch/AccelConf/JACoW/Documents/default.html>

Processing transparencies

- Annoying things that could happen -

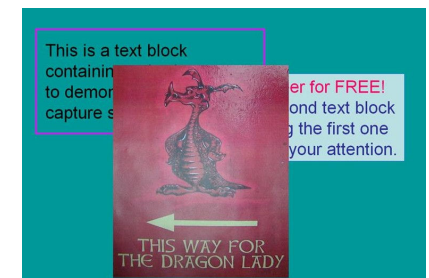

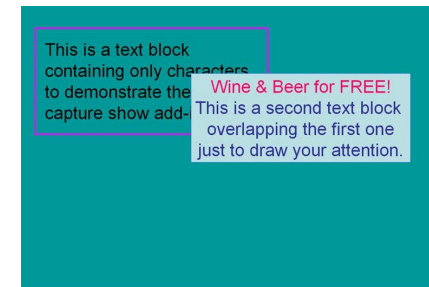

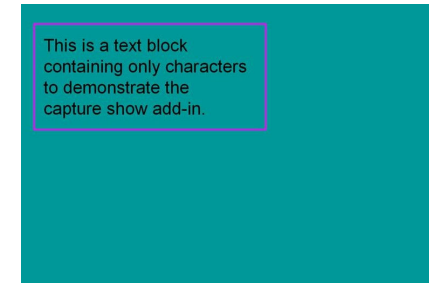

- ▶ Overlapping stuff
- ▶ Possible error messages from PDF Maker and Acrobat

Processing transparencies

- how to get rid of overlapping contents -

- ▶ The PowerPoint “**Capture Show add-in**” is a nice tool to separate animated overlaps in slide presentations

Example: Slide containing 2 overlaps will be separated automatically into 3 slides

Processing transparencies

- how to get rid of overlapping contents -

- ▶ visit the website at the given URL to download the “Capture Show” add-in

<http://skp.mvps.org/cshow.htm>

- ▶ website contains detailed description on how to install and how to use the add-in
- ▶ Check PDF slides carefully after conversion from PPT. Look for missing fonts or characters which do not display correctly

Please note: The Capture-Show add-in is not available for Macintosh computers

Processing transparencies

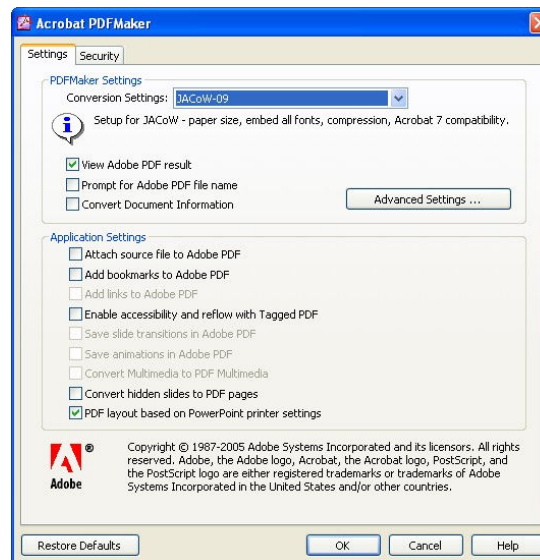

- possible error messages -

Processing transparencies - possible error messages -

PowerPoint Error Message:

“Acrobat PDF Maker failed to convert the PowerPoint file”

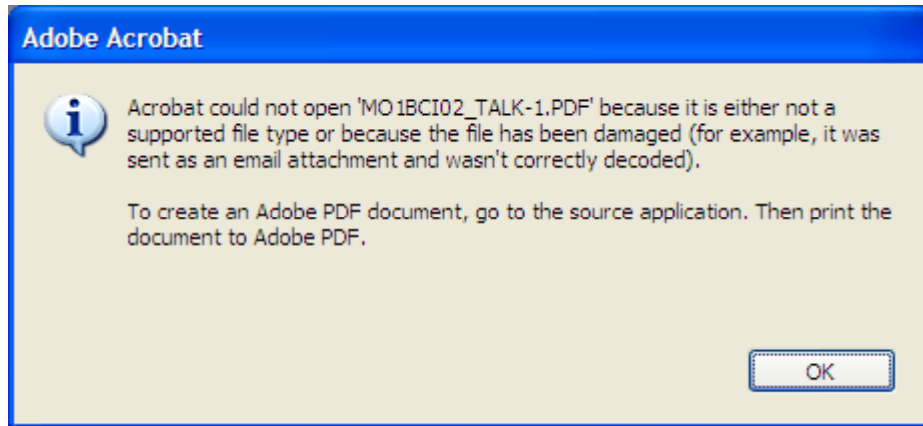

- ▶ change the conversion settings from Standard to JACoW

Processing transparencies - possible error messages -

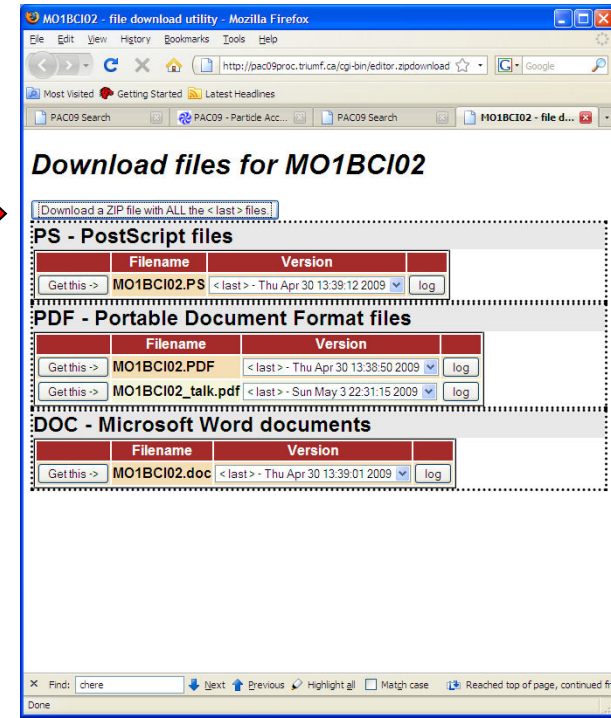

Adobe Acrobat Error Message:

"Acrobat could not open the downloaded _talk.pdf file from the SPMS"

- ▶ The downloaded PDF file might be of zero length (empty file). To fix that, click on

Download a ZIP file with ALL the < last > files.

Processing transparencies - time and effort -

- ▶ Conversion of PPT files to PDF is time consuming
- ▶ Checking the PPT and the PDF files is time consuming
- ▶ Slides cannot be processed in advance like papers
- ▶ Extra (wo)manpower is necessary to process the slides

Some numbers (2009 conferences):

PAC09 201 Talks, processed by 2 students + 1 editor

DIPAC09 24 Talks, processed by 1 editor

FEL09 58 Talks, processed by 2 editors

Processing transparencies

Questions and comments?

Thank you 😊
