

# Interplay of Collider and Flavour Physics

The background features a complex, abstract design. It includes several overlapping, semi-transparent colored regions in shades of green, orange, and blue. A prominent feature is a large, multi-colored starburst or particle track pattern on the right side, radiating from a central point. On the left, there is a yellow, rounded rectangular shape with red diagonal lines inside, resembling a detector component or a specific particle signature. The overall aesthetic is scientific and dynamic, suggesting the interconnected nature of collider and flavour physics.

3rd general meeting

14-16 Dec 2009

CERN

Organizers: J. Ellis, T. Hurth, S. Kraml, M. Mangano
