

Argus

Christoph Witzig

GDB meeting @CERN January 13th 2010

Argus Test Status

- Argus either installed or being installed: CNAF, Karlsruhe, SWITCH, SRCE.
-
- Karlsruhe installed Argus but reported a problem that we were previously not aware of.
- SRCE has switched from SL4 to SL5 and is installing Argus now under SL5 (Argus is only certified on SL5).
- SWITCH: is installed but it is a miniscule site
- CNAF: Is waiting for the next release, which contains client authentication and ldap support. They plan to install this version into the production environment. It is planned that it is available by the end of this week.
-
- We currently have no news from Brunel and CESNET.
-

Experiment Testing

- Only Alice attended the recent call.
- Any testing of glexec/SCAS should be easily retriabale at Argus sites.
 - Eg SAM tests or user tests
 - Users only see glexec.
