

# VOMS Coordination

GDB

*John Gordon, STFC-RAL  
GDB meeting @Prague, April 4, 2007*

## History

- At February GDB Maria Dimou reported on the completion of the original working group's mandate.
- In March we considered ongoing coordination to stop things diverging and to address the unresolved issues Maria raised.

<http://dimou.web.cern.ch/dimou/lcg/registrar/TF/gdb-tf-20070207.ppt>

- I bring this mandate for a future group for GDB's consideration

## Mandate

The VOM(R)S Working Group will be responsible for:

1. Bringing together the VOMS/VOMS-ADMIN/VOMRS developers to ensure the products evolve in a **coordinated fashion** matching users', VO/ROC Managers', services' and security requirements.
2. Maintaining the quality of CERN HR database link, adapt to the new Oracle versions and tailor the other paraphernalia (e.g. java, tomcat etc) for performance and quality.
3. Ensuring thorough product testing and a forum to discuss issues before adoption in production.
4. Agreeing on the priorities for bug fixing and information dissemination to users at large.

GDB

# Decision

- Does the GDB approve the mandate in this form?
- If so, I propose asking Maria Dimou to lead it.
