

What WP7 can do for you

First ULICE Annual Meeting
Stockholm, September 3rd 2010

Deliverables to date

M 3 Dec 2009

7.1	Federated security infrastructure; metadata services for recording terminology; model generation components for the creation of data capture interfaces	Bleddyn Jones
-----	---	---------------

M 6 Mar 2010

7.2	Selection, development and curation of metadata elements and models for the capture of inter-operable presentation, treatment and outcome data for large hadron-therapy	Bleddyn Jones
-----	---	---------------

semantics

to use data *reliably* and *efficiently* outside the immediate context of its collection, we need a computable representation of its meaning

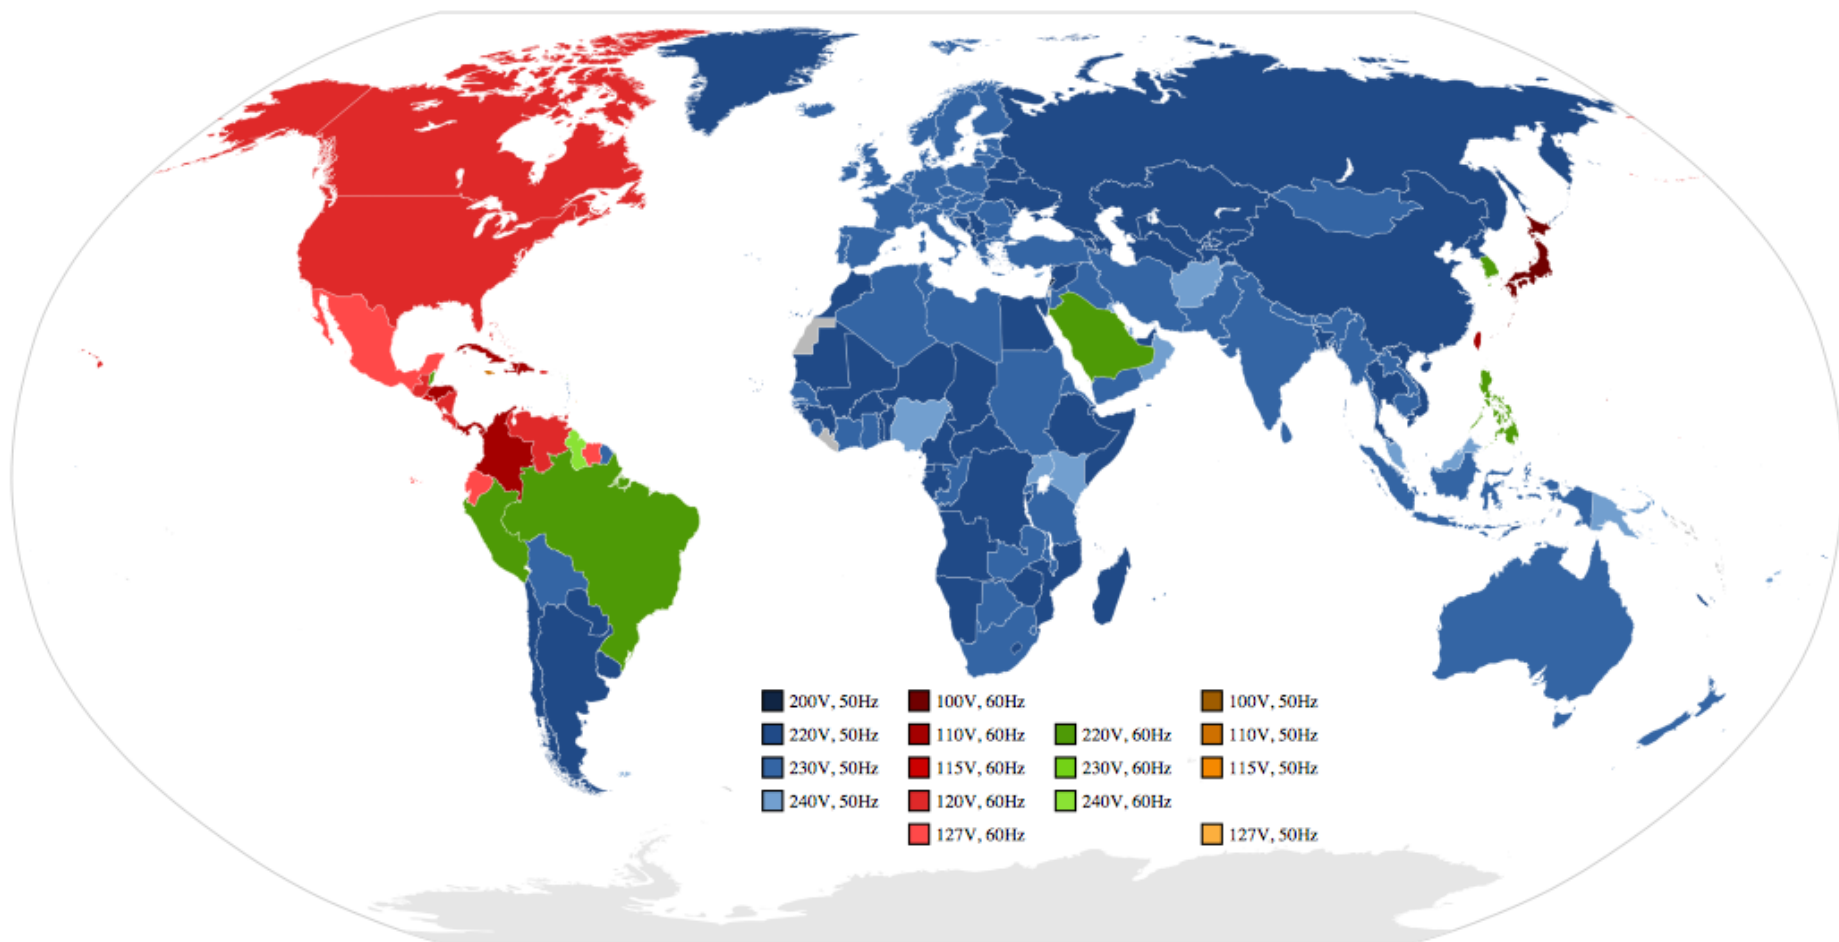

we need semantic metadata

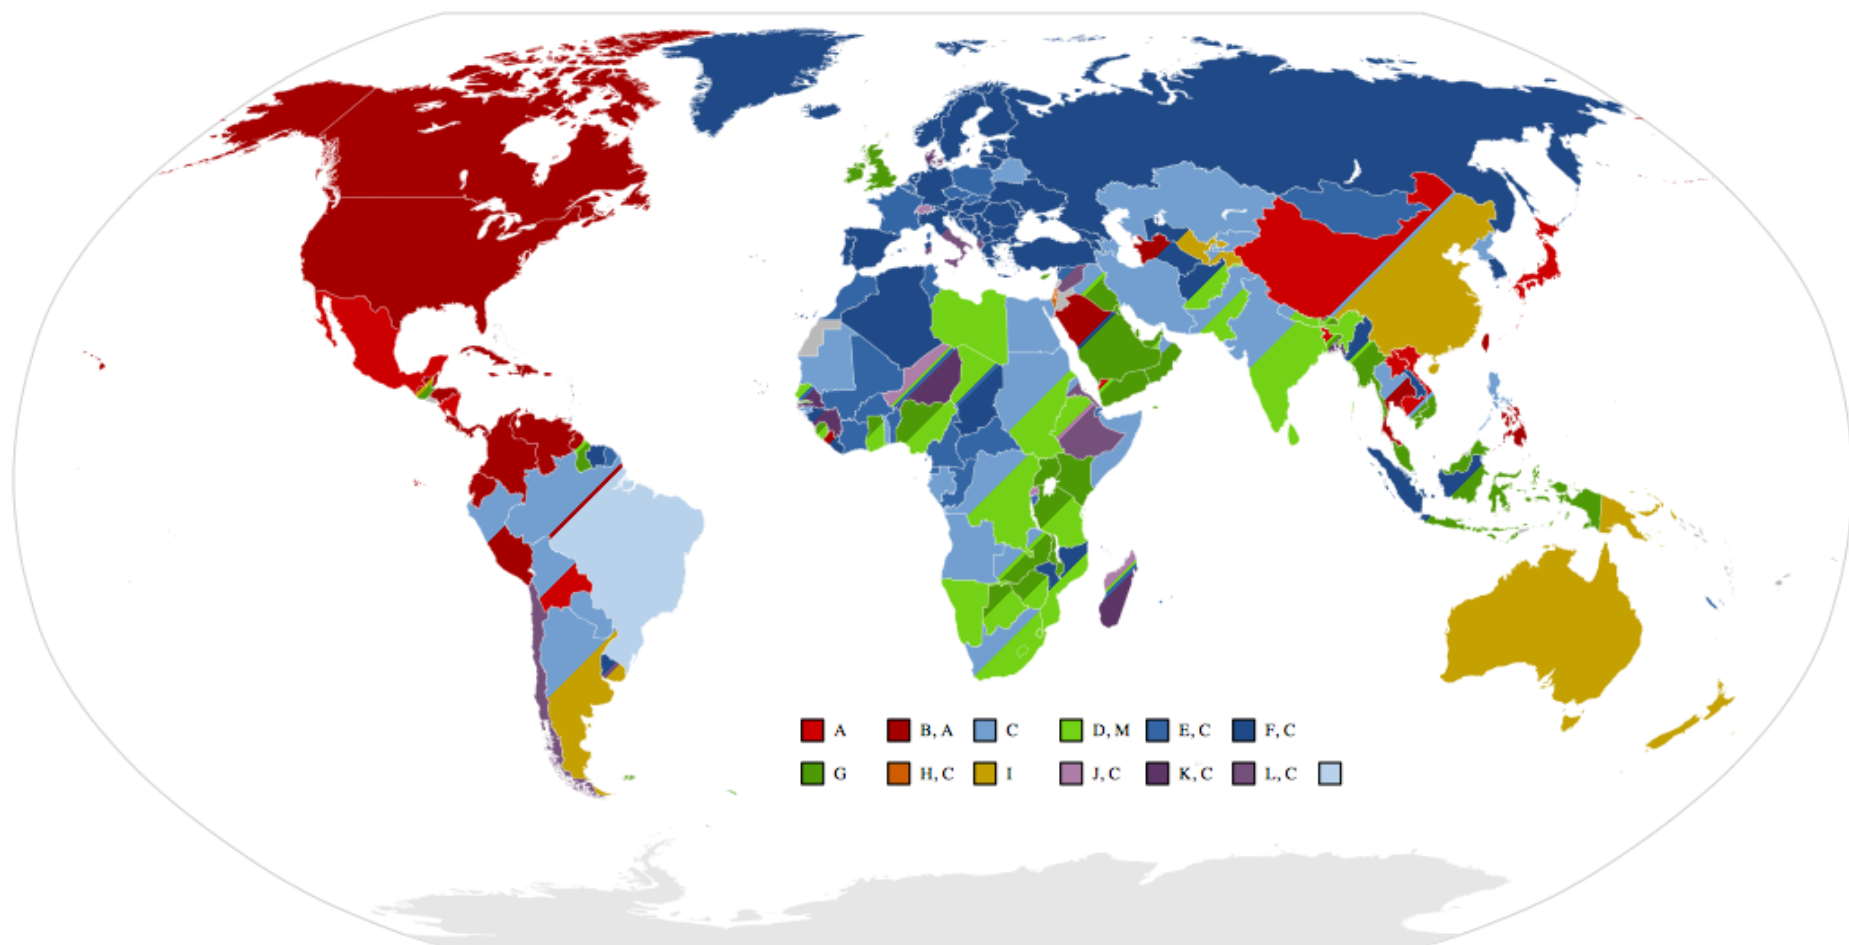

semantic metadata

- value domain – range of possible values and their intended interpretations
- context
 - natural language definition of data item
 - PDF of form in which it appears
 - documentation for workflow or protocol
 - *schema* for form, or database, or workflow

semantic interoperability

- semantics are local, temporary, and specific to purpose
- we need to support multiple standards, multiple versions of standards, because
 - this is *research* and we expect *change*
 - we are working in multiple contexts

WP7

- metadata registry
 - record and publish *your* value domains and data definitions
 - add *models* of forms, schemas, protocols, proposed standards
 - relate your data, your models, your work to the work of others

WP7

- metadata services
 - annotate existing data sets, forms, protocols, models, with links to published definitions
 - instantiate a *metamodel* for clinical trials to produce a model of your own trial
 - generate forms *and trial management services* from your own model

open for business

the technology

- is ready now, works on standard platforms, and is entirely open (BSD license)
- will be maintained, supported, and enhanced to address user requirements
- can be used *locally* and federated; it is also interoperable with the US NCI provision

Data Element: ECOG Performance Status

[as XML](#)

Administered Item - Preferred Name: ECOG Performance Status

Administered Item Identifier	GB-CANCERGRID-D1E682341-0.21
Registration Status	Recorded
Registered By	Dr. Peter Macallum Project Manager, CancerGrid 01223 765348

Designation

Context	Clinical Trials
Name	ECOG Performance Status (preferred designation)
Definition	Used to assess how a disease is progressing, how the disease affects the daily living abilities of the patient, and determine appropriate treatment and prognosis.
Language	GB-eng
Definition Source Reference	
Context	Clinical Trials
Name	Summario dei dati per ECOG
Definition	Definizione Usato per valutare come la malattia evolve, come la malattia influenza le attivita' di vita quotidiana del paziente e per determinare trattamento e prognosi adeguati
Language	Italian

Type	enumerated		
Full Record	ECOG Performance Status		
Summary	permissible value	value meaning	reference
	0	Normal	urn:lsid:ncicb.nci.nih.gov:nci-thesaurus:C19998
	1	Symptomatic: fully ambulatory	urn:lsid:ncicb.nci.nih.gov:nci-thesaurus:C19999
	2	Symptomatic: in bed less than 50% of the time	urn:lsid:ncicb.nci.nih.gov:nci-thesaurus:C17846
	3	Symptomatic: in bed greater than 50% of the time	urn:lsid:ncicb.nci.nih.gov:nci-thesaurus:C17847
	4	100% bedridden	urn:lsid:ncicb.nci.nih.gov:nci-thesaurus:C17848
	5	dead	urn:lsid:ncicb.nci.nih.gov:nci-thesaurus:C20000

Related Data Elements

asserted by this data element	id	preferred name	how related	status
	GB-CANCERGRID-D1E573861-0.19	ECOG performance status is 0, 1 or 2	narrowerTerm	Recorded
