

CERN Joint EP/PP Seminars

SPEAKER: **Geoffrey Mills (Los Alamos National Laboratory / Subatomic Physics Group)**

TITLE: **Nus and Anti-Nus from MiniBooNE**

DATE: Tue 26/05/2009 16:30

PLACE: Main Auditorium**

ABSTRACT

The MiniBooNE experiment, a short baseline neutrino oscillation experiment currently running at Fermilab, has spent the last two years building up its supply of anti-neutrino data. The collaboration has combed through a good fraction of the anti-neutrino data and the already substantial neutrino data stockpile. The intriguing results will be explored in this seminar, along with future possibilities for short baseline program in the Fermilab booster neutrino beam.
