

# CERN Joint EP/PP Seminars

SPEAKER: **Milind Diwan (Brookhaven National Laboratory)**

TITLE: **Recent Results from FNAL long baseline program and future plans**

DATE: Mon 14/12/2009 11:00

PLACE: Council Chamber\*\*

## ABSTRACT

I will describe the currently running MINOS experiment at FNAL and the future plans for the accelerator based neutrino oscillation program including NOvA and the Homestake based initiative. I will describe the recent data and analysis from the MINOS experiment with emphasis on the electron neutrino result. I will conclude with plans for the experiment with a super neutrino beam from Fermilab to the underground laboratory at the Homestake mine. "
