

## **Technical information for speakers at the ULICE/ENLIGHT/PARTNER meetings in Marburg.**

The auditorium is equipped with typical presentation hardware. A notebook, connected to a projector, will be available for presentations: all Microsoft Office file formats are supported (any version, including Office 2010) and Adobe PDF. Even with these supported formats, we cannot guarantee the correct functioning of embedded objects, e.g. video clips inside your presentations. If these are required, please consider bringing your own notebook (see further down) or contact me as soon as possible.

If you intend to use the notebook provided, please bring your presentations along on a USB storage device and mention it at the registration desk or send them per email to the address below. Please, do NOT bring presentations on optical disks (CD/DVD/BD).

It is also possible to connect own notebooks to the projector (quickly, for each individual talk), but only through a (D-sub 15) VGA port. If your notebook has a different output, please bring your own adapter, if applicable, e.g. Apple Mac notebooks.

In any case a wireless presentation remote control, with a built-in laser pointer, will be provided. If you are not sure whether any of the above mentioned restrictions may affect your presentation, do not hesitate to contact [ammazzal@med.uni-marburg.de](mailto:ammazzal@med.uni-marburg.de)
