OpenScientist. Status of the project.

Monday 27 September 2004 16:30 (20 minutes)

We want to present the status of this project.
After quickly remembering the basic choices around GUI, visualization
and scriptingm we would like to develop what had been done in order to
have an AIDA-3.2.1 complient systen, to visualize Geant4 data (G4Lab module),
to visualize ROOT data (Mangrove module), to have an hippodraw module
and what had been done in order to run on MacOSX by using the native
NextStep (Cocoa) environment.
