

Tier-1 deployed capacity  
and near-term projections

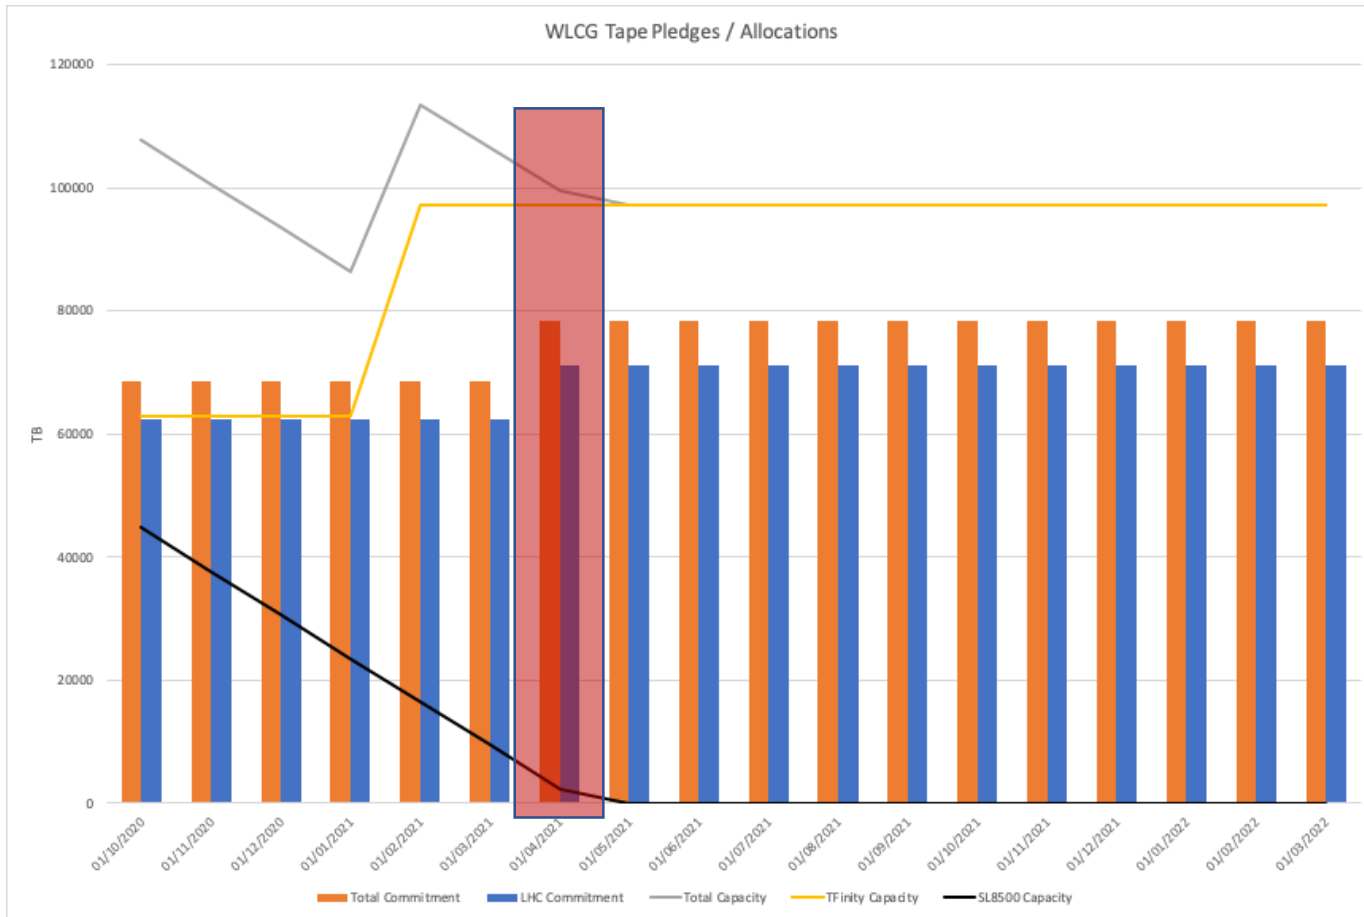

# WLCG CPU Pledges / Allocations

# WLCG Disk Pledges / Allocations

# WLCG Tape Pledges / Allocations

# LSST Allocation

- In September 2020, LSST provided RAL with £800k capital to provide:
  - 9PB of Disk (accessible via S3)
  - 3PB of Tape
- They did not need the majority of this until their data taking started in 2023.
- We purchased:
  - 4.25PB of Disk capacity for them (£250k).
  - 162k HS06 for GridPP to use (£550k).
- We would purchase the remaining capacity for LSST in 2 - 3 years out of GridPP Capital.
