➤ Summer drink all

Place J. Mulon

1 July 2010

DT personnel matters

- New fellow: Alessandro Mapelli, start 01.07.2010, WP11 (detector cooling), supervisor P. Petagna
- Scientific associate: Bart Verlaat (NIKHEF, Amsterdam), start 1.9.2010 (for 1 year), CO₂ cooling expert. Will work in DT cooling team.
- Philippe Lancon will leave DT and start on 1 September in TE/VSC group (vacuum coating).
- Didier Gabriele. End of contract on 30 June. Will work as PJAS, affiliated to Austrian Institute, in *medAustron* project (Ion therapy).
- Doct. student A. Moraux (WP11) asked to terminate his contract end of July. Purely private reasons.
- Summer students: Mikko Viitala (FIN), Johannes Kaikkonen (FIN), Chris Lucas (UK). Maarten van Dijk.
- Two DT people currently in hospital: Richard Fortin, Paolo Petagna.

DT Space

- New exhaust system on roof of B102 (EN dep. → significantly reduced noise for people in B70, 166, 20/21
- B20/21/168: Agreement with GS department for thorough repair of roof leaks. Will be done in second half of 2010.
- In parallel: global review of the building (facade, insulation, windows, sanitary installations, infrastructure (electricity).
- Global refurbishment of the building in 2011 ???

Other news ?

- Eric David started on 1 July 1975 at CERN.
→ Today it's 35 years.
 - Pierre-Angé Guidici and François Garnier successfully completed first superconducting coil for AEGIS.
 - Felix Bergsma and Pierre-Angé measured the AMS permanent magnet → will fly to ISS on the very last flight of the space shuttle (still this year).
 - Mar Capeans is back from her maternity leave.
 - MARS: Quite a few DT people obtained a promotion (new CP, SB, extra steps and premiums)
- **Good reasons for a summer drink!**
