

# SHiP Joint physics and detector meeting - vacuum vessel workshop

**Updates on photon transport simulation**

**Vladyslav Orlov**

**Taras Shevchenko national university of Kyiv, Ukraine**

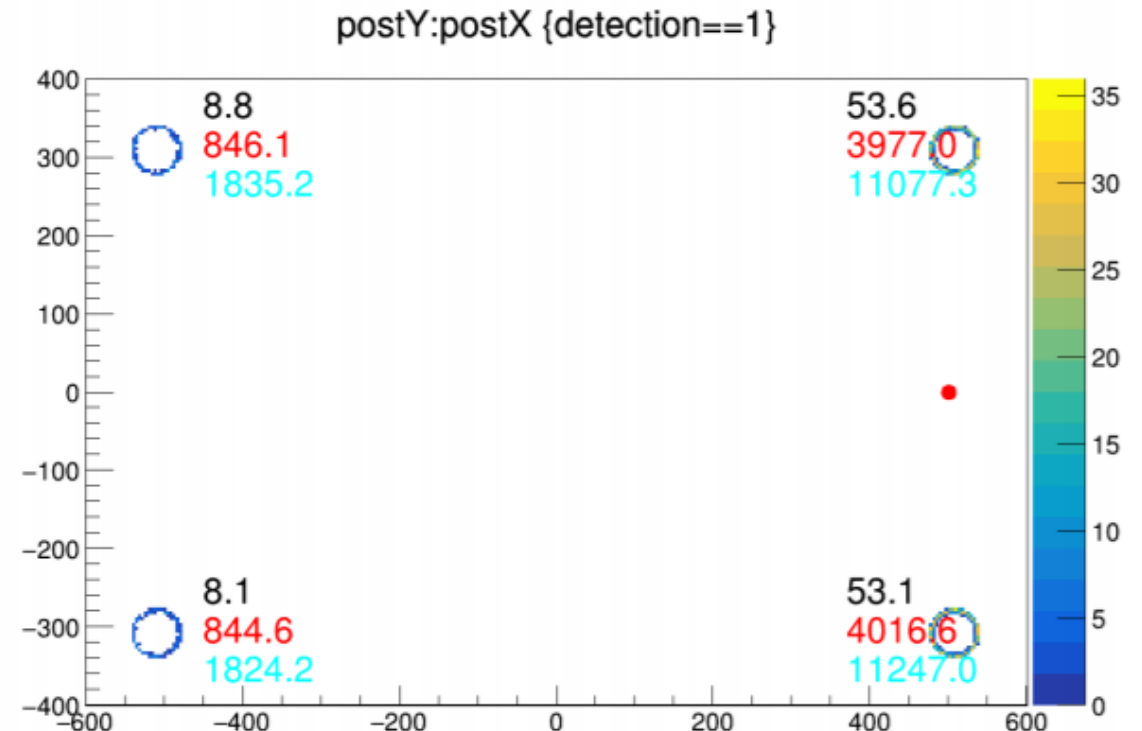

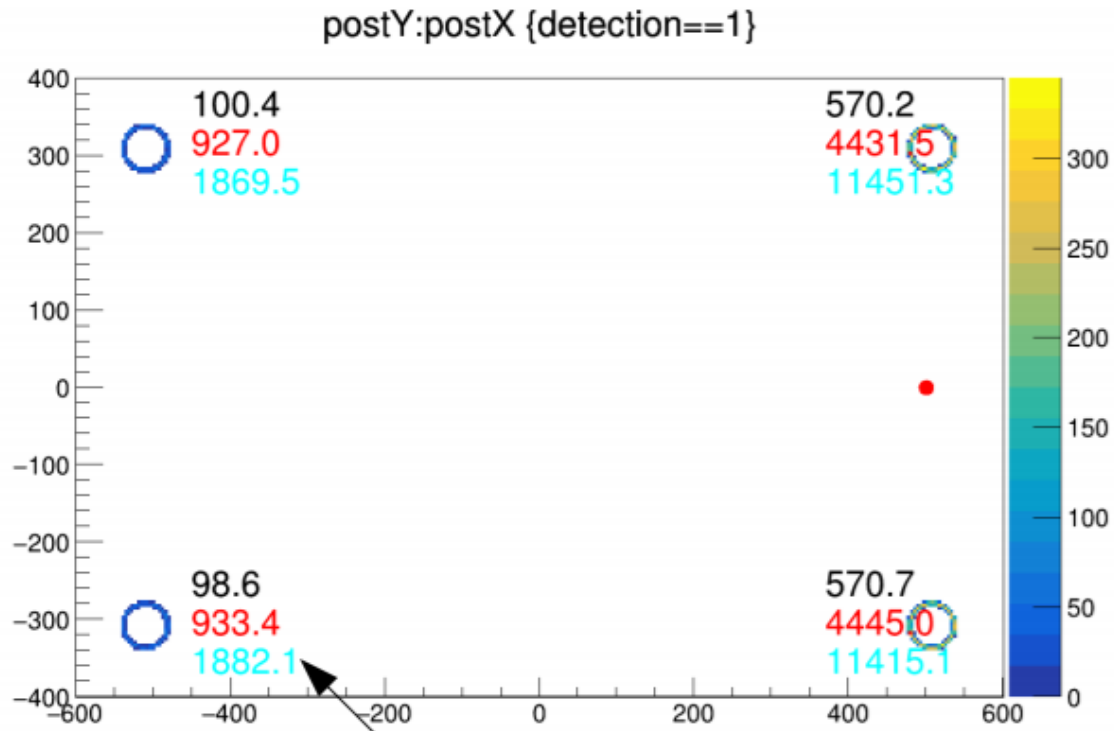

# Absorption length study

# Implementation of the absorption length for PMMA

by Andrii Kotenko

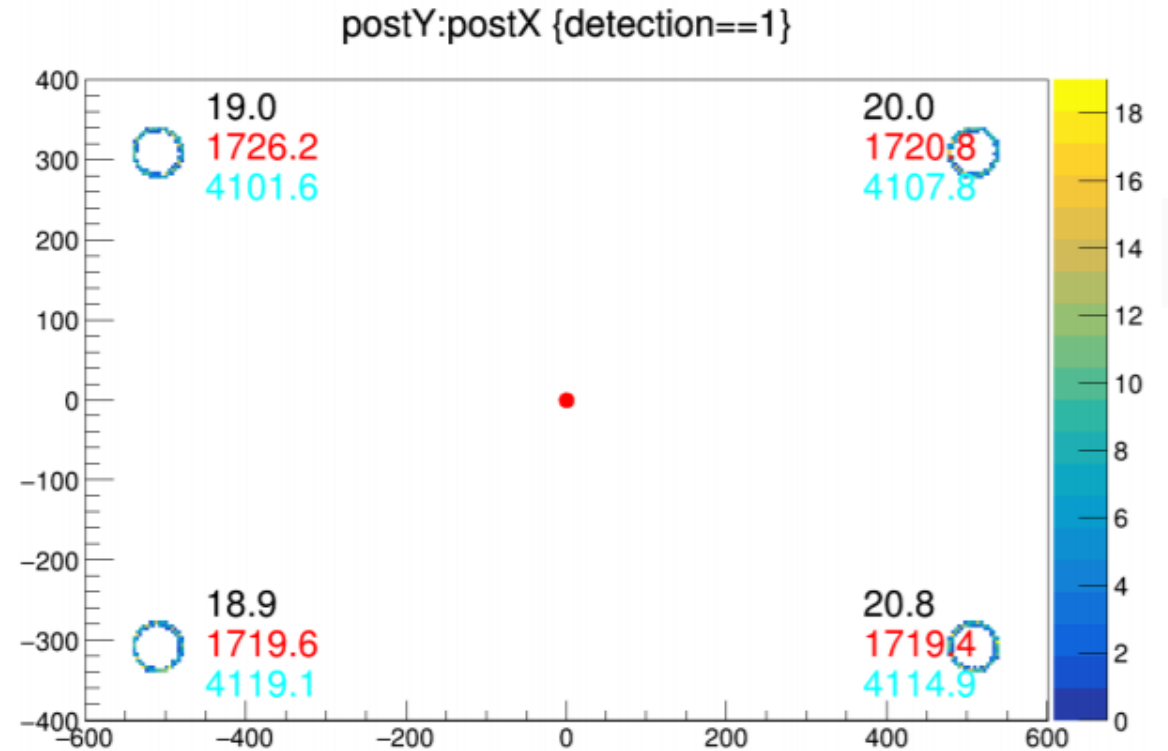

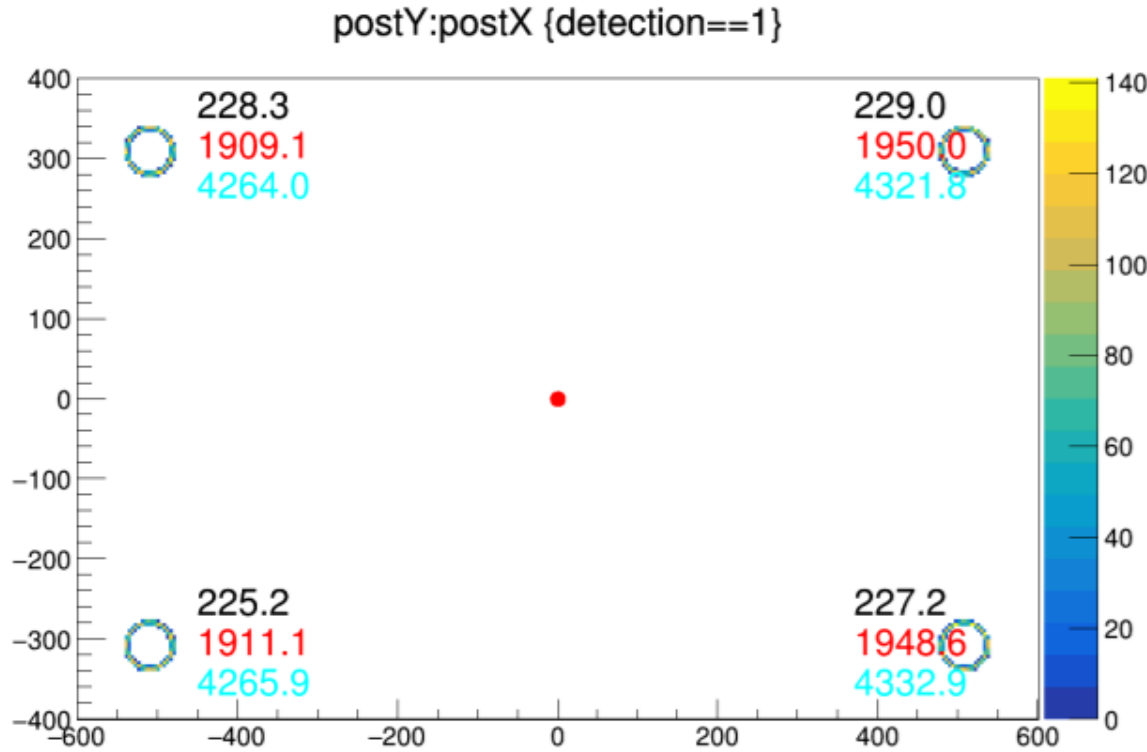

# Comparison for 1 GeV muons

(1) detected, (2) fallen on WOM(3), fallen on PMMA vessel

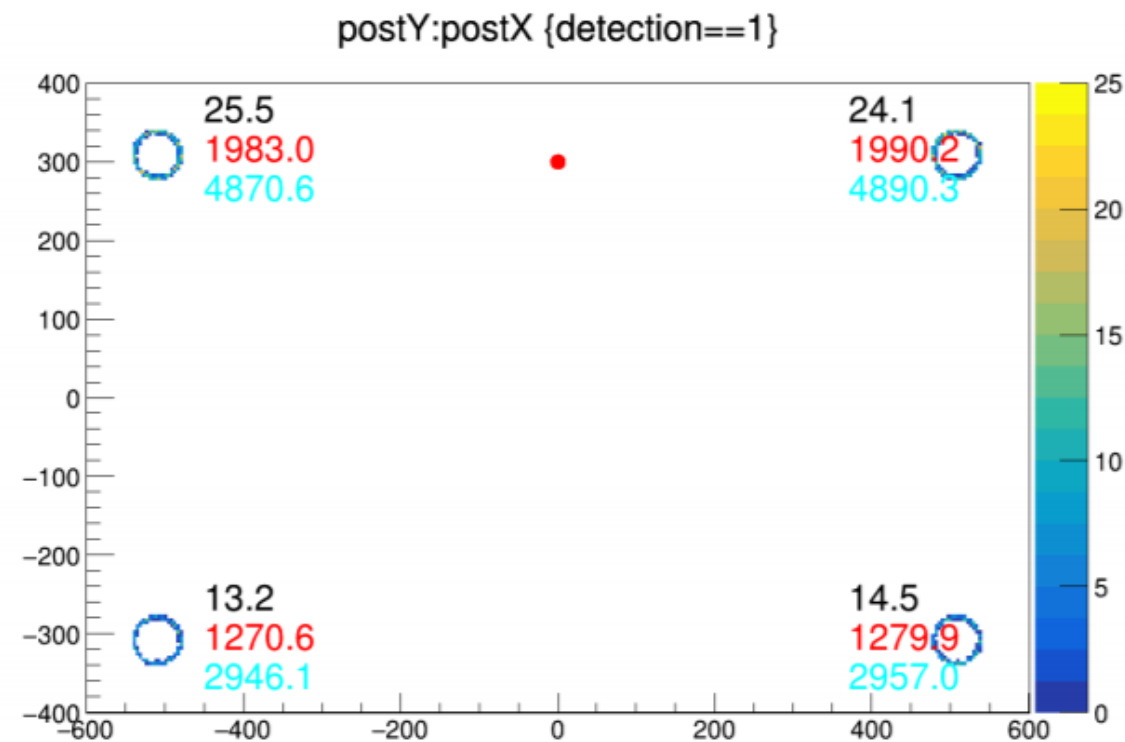

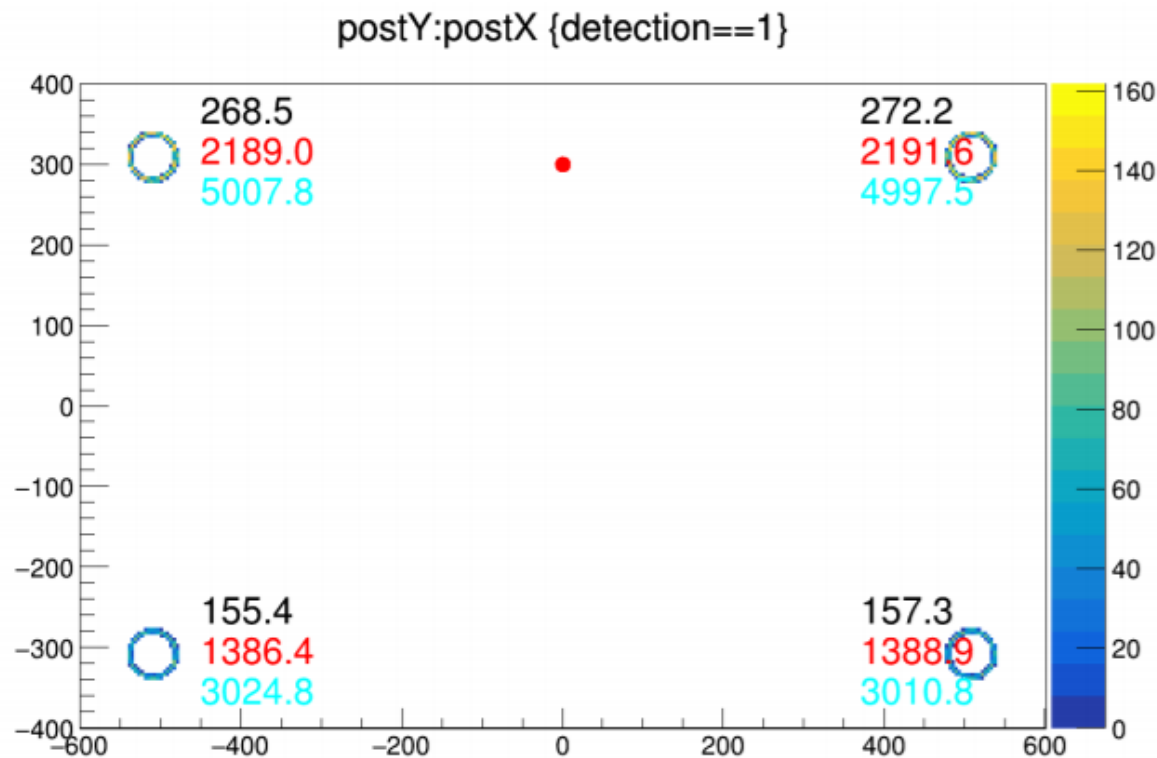

by Andrii Kotenko

# Comparison for 1 GeV muons

by Andrii Kotenko

# Comparison for 1 GeV muons

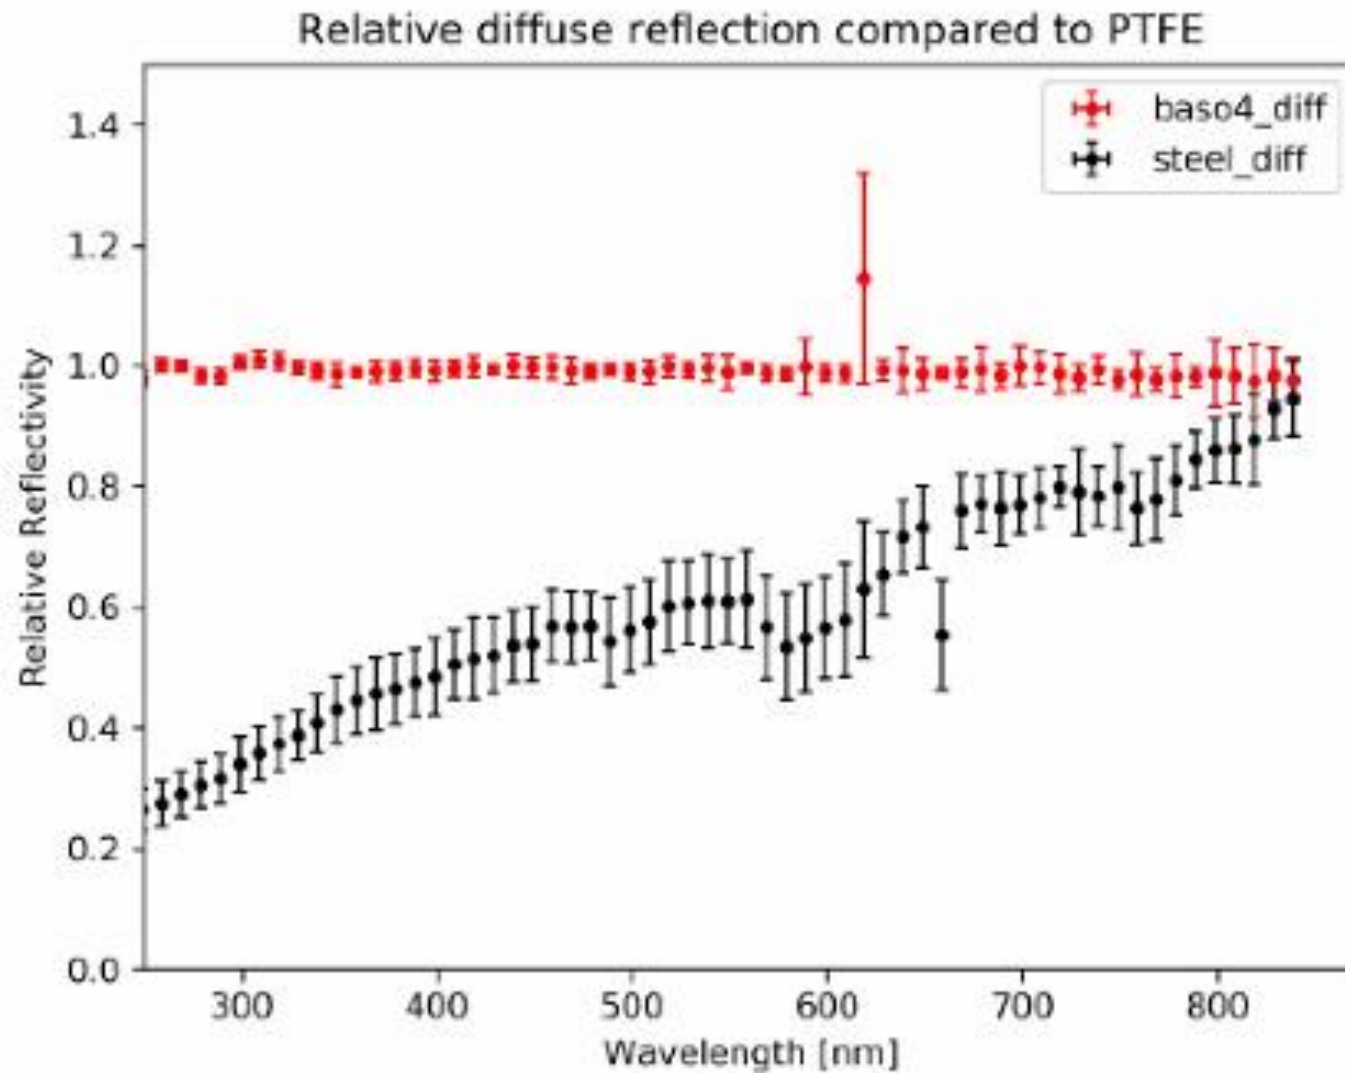

by Andrii Kotenko

# Reflectivity of the coating

# Implemented reflectivity of $BaSO_4$ coating

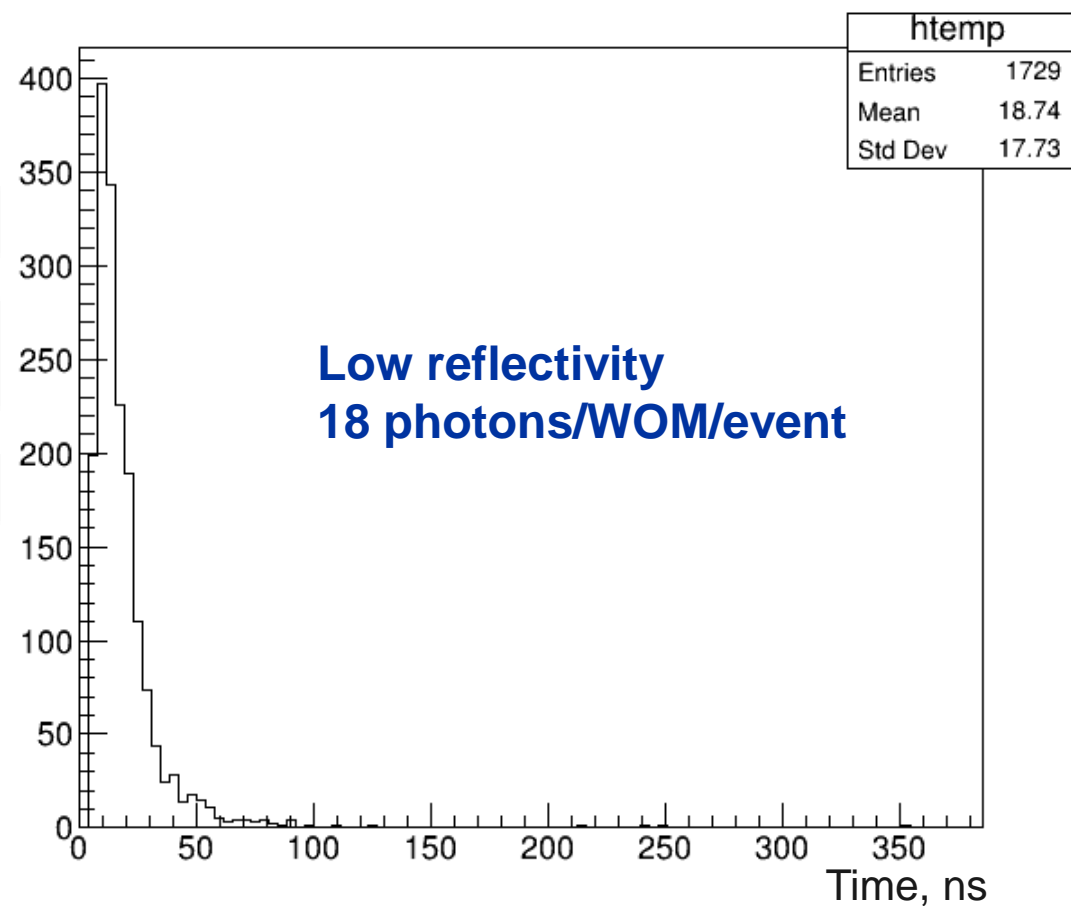

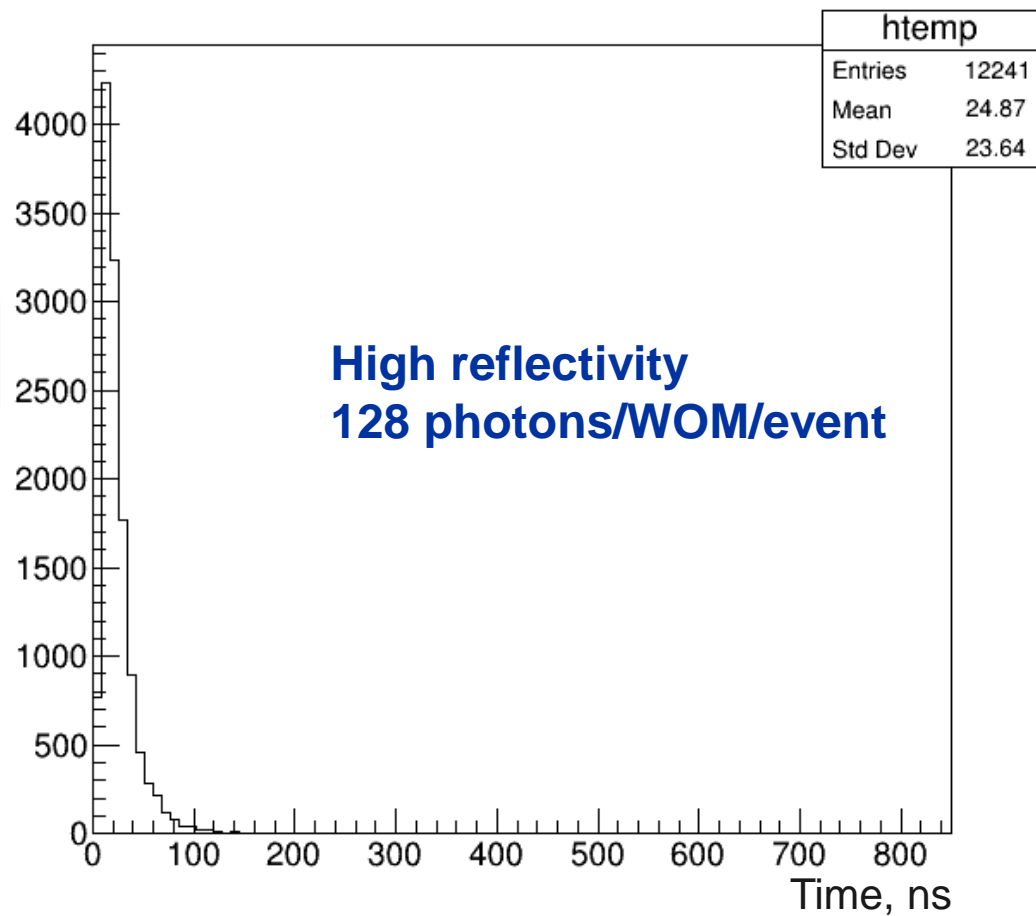

by Patrick Deucher (Mainz)

# Simulation with 4 WOM tubes at the corners

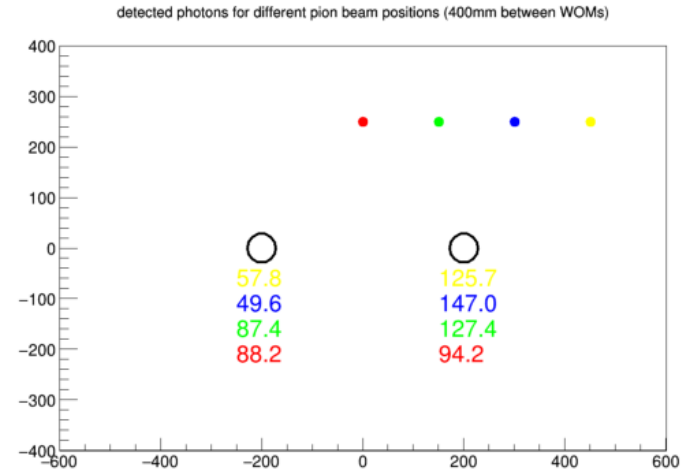

# 1 GeV $\mu^+$ hitting at the center

# Geometry optimization for 2 WOMs

Detector response vs beam position (400mm between WOMs)

by Andrii Kotenko

**Thank you!**
