

Pythia week Spring 2021

JYVÄSKYLÄ MEETING

April 12th, 2021

The theme of the week: Pythia future

Meeting outcomes

1. Formulate the organizational structure and appoint persons
 - We have a document that describes duties related different roles and how these are selected
 - Have selected Spokesperson, Codemaster and Webmaster
 - Have written down the meeting structure
2. Familiarize us with some of the new features and prepare for 8.3 promotion
 - Hands-on sessions to test new features, will continue having such
 - Discuss about tuning for 8.3 and decided to set up a separate meeting to start the effort
3. Discuss about the future of the collaboration
 - We have listed ideas and a document will be compiled

Online-meeting challenges

- Global collaboration leads to time-zone challenges
- Zooming the whole day is tiring
 - Probably better focus on hours possible for everyone
 - Possibly include more items that can be done offline
- Or perhaps have week-long meetings only in-person

General considerations

- When asking contributions follow up to make sure that everyone are on the same page to avoid last-minute updates
- Make effort to activate all participants
- Having external speakers (any topic) can be refreshing
- Good to have a few people in the organization committee
