Excited states and precision results for nucleon charges and form factors

Monday, 26 July 2021 14:15 (15 minutes)

Starting with a summary of our studies of the sensitivity of various charges and form factors to the excited state spectrum, including input from PCAC, vector meson dominance and chiral perturbation theory, I will present an update on results for nucleon charges and form factors.

Primary authors: GUPTA, Rajan (Los Alamos National Lab); BHATTACHARYA, Tanmoy (T-2); CIRIGLIANO, Vincenzo (Los Alamos National Laboratory); JOO, Balint (Oak Ridge National Laboratory); MEREGHETTI, Emanuele (University of Arizona); MONDAL, Santanu; YOON, Boram; WINTER, Frank (Jefferson Lab); PARK, Sungwoo (Los Alamos National Laboratory)

Presenter: GUPTA, Rajan (Los Alamos National Lab)

Session Classification: Hadron Structure

Track Classification: Hadron Structure
