KEK-B crab trips & RF signals

Thursday 16 December 2010 11:20 (20 minutes)

Cavity trips and associated RF & beam observations at KEKB. Types of trips, their signature and the (presumed) root causes. Possible mitigation schemes for LHC.

Authors: NAKANISHI, Kota (Japan/KEK); HOSOYAMA, kenji (KEK, High Energy Accelerator Research Organization)

Presenter: NAKANISHI, Kota (Japan/KEK)

Session Classification: Machine Protection
