

PBC Technology working group

Updates on the “old-timers” and new initiative

Babette Döbrich, Andrzej Siemko

Welcome back!

- the PBC mandate has been renewed (attached in agenda): “explore the opportunities offered by CERN’s unique accelerator complex, its scientific and **technical infrastructure**”
- general meeting next week. We have a 20min talk on wednesday: [click](#)
- the Technology working group continues (with your favorite conveners)!

Our WG was rather successfull!

Examples:

- VMB at CERN established (dedicated talk next week)
- babyIAXO magnet designed by CERN magnet experts, supported by PBC (dedicated talk next week)
- *your input*

Today's meeting

- very brief update of past WG progress (or reasons why progress was not possible)
- addition of a new initiative
- we have limited time today, **please stick to your slot!**
- your input/slides will be used for next week's workshop
- opportunity to discuss in more detail in next WG meeting (to be scheduled)

Finally

- we have to collect funding proposals from our WG, please let us know a.s.a.p. if you have a well-justified request, for when, why in what form etc. (last mandate there was one fellow for babyIAXO)
- **Questions?**
