

## Vertex 2010 Proceedings Organisation

The proposal for which papers you will be responsible for managing the reviewing of is attached.

You don't need to review them yourself necessarily, as long as you take care that they are reviewed.

You typically have four each, partially allocated according to the sessions you organised (but with quite a few exceptions to make it fit inevitably), and avoiding any obvious conflicts (e.g. same experiment).

Please let me know if you want to swap any, or have any other problems with the allocation.

The authors all received their submission information on Monday 5<sup>th</sup> July, the deadline for submissions is 1st September.

Each paper will appear on PoS as soon as they have been reviewed, corrected, reviewed again... and then approved, so there will not be a delay in waiting for the last paper.

I'd ask that you ensure comments are given on the papers within two weeks of them being received.
