## Search for hadronic resonances at CMS (15' + 5')

*Friday 10 June 2011 14:50 (20 minutes)*

We present the results of searches for new heavy resonances in dijet,  $t\bar{t}$ , and multijet hadronic final states in the  $pp$  collisions at 7 TeV delivered by LHC and collected with the CMS detector in 2010. No excess of events above the standard model predictions has been found.

**Presenter:** OZTURK, Sertac (University of Iowa)
